The Truth about Transformation Kevin Novak, 2023-07-22 Any organization that seeks transformation desires to take advantage of new opportunities and growth. Most organizations turn to technology as the major driver of change. But technology is an enabler, not a silver bullet. Mistaking technology for transformation will lead an organization to failure. True transformative change requires an understanding of the human factors at play: how conscious and subconscious behaviors can derail any plan, and how society is influencing your organization. Change is the only constant. An evolving reality is emerging, one that will fundamentally change who we are, how we work, and how organizations will be relevant today and in the future. The truth about transformation is not what you may think. This guide to organizational transformation will surprise, confound, provoke, and challenge every ingrained belief. The future is out there, and the truth about transformation will change how you lead.
