Work on Employee Well-being and Health Rolf Van Dick, Anja Baethge, Nina M. Junker,2024-12-31 The rapidly growing

field of organizational psychology has over the last few years become one of the fastest growing branches of psychology. Particularly taking care of the health and well being of employees in the workplace cannot only be considered a moral imperative but has begun globally to be recognised as driving forces of socio economic growth. Employee health and well being is crucial to organizations in regards to improved productivity, employee performance, job satisfaction, staff retention, reduced absenteeism, increased job satisfaction and work commitment. Thus research relating to employee well being and health has produced some significant results and furthered our understanding of this subsection of the organizational psychology field. The evolvement of the way we work has also gained traction in the organizational psychology field in relation to remote working. Since the Covid 19 pandemic many workforces have adapted more or less permanently to this form of working. Frontiers has organized a series of Research Topics to highlight the latest advancements in research across the field of organizational psychology and the implications of remote working. This editorial initiative of particular relevance led by Professor Rolf van Dick, Specialty Chief Editor of the Employee Well being and Health section alongside Dr Anja Baethge and Dr Nina Junker is focused on the implications of remote working on employee well being and health.

Empowered or Left Behind DeeDee M. Bennett Gayle, Xiaojun (Jenny) Yuan, 2023-07-14. Focused on the United States, this book summarizes the secondary impacts of COVID 19 due to the increased use of technology. Establishing the global response of social distancing mandates for non essential business and working from home, the book centers on the disparate guidance provided domestically at the state and local levels. Marginalized populations are highlighted to identify areas where technology facilitated access and reach or contributed to difficulties catapulted by digital literacy or digital access issues. To explain how people may have been empowered or left behind due to a new and unique reliance on technology, this book is structured based on the social determinants of health domains. Specifically, this book explains how technology was an umbrella domain that impacted every aspect of life during the pandemic, including access, use, adoption, digital literacy and digital equity, as well as privacy and security concerns. Given this book's focus on the impacts to marginalized populations, there is a thread throughout the book related to the use of technology to perpetuate hate, discrimination, racism and xenophobic behaviors that emerged as a twin pandemic during COVID 19. Part I explains the defining differences between primary and secondary impacts as well as the unique guidelines adopted in each state. Part II of the book is focused on specific domains where each chapter is dedicated to topics including economic stability through employment, education, healthcare and the social community context through access to services. Part III focuses on unique technological considerations related to COVID 19 such as mobile health related apps and privacy or security issues that may have posed barriers to the adoption and use of technology. Finally, the book ends with a conclusion chapter which explicitly explains the advantages and disadvantages of technology adoption during COVID 19. These exposed benefits and challenges will have implications for policies, disaster management practices and interdisciplinary research.
