 Terras, Vikki Jones, Nicola Osborne, Chris Speed, 2024-04-17 The creative industries the place where art business and  
 technology meet in economic activity have been hugely affected by the relatively recent digitalisation and often monetisation  
 of work home relationships and leisure Such trends were accelerated by the global COVID 19 pandemic This edited collection  
 examines how the creative industries can be supported to make best use of opportunities in digital technology and data  
 driven innovation Since digital markets and platforms are now essential for revenue generation and audience engagement  
 there is a vital need for improved data and digital skills in the creative and cultural sectors Taking a necessarily global  
 perspective this book explores the challenges and opportunities of data driven approaches to creativity in different contexts  
 across the arts cultural and heritage sectors Chapters reach beyond the platforms and approaches provided by the  
 technology sector to delve into the collaborative work that supports innovation around the interdisciplinary and cross  
 sectoral issues that emerge where data infrastructures and approaches meet creativity A novel intervention that uniquely  
 centres the role of data in the theory and practice of creative industries innovation this book is valuable reading for those  
 researching and studying the creative economy as well for those who drive investment for the creative industries in a  
 digitalised society The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a
