The Menial Art of Cooking Sarah R. Graff, Enrique Rodríguez-Alegría, 2012-05-15 Although the archaeology of food has long played an integral role in our understanding of past cultures the archaeology of cooking is rarely integrated into models of the past The cooks who spent countless hours cooking and processing food are overlooked and the forgotten players in the daily lives of our ancestors The Menial Art of Cooking shows how cooking activities provide a window into other aspects of society and as such should be taken seriously as an aspect of social cultural political and economic life This book examines techniques and technologies of food preparation the spaces where food was cooked the relationship between cooking and changes in suprahousehold economies the religious and symbolic aspects of cooking the relationship between cooking and social identity and how examining foodways provides insight into social relations of production distribution and consumption Contributors use a wide variety of evidence including archaeological data archival research analysis of ceramics fauna botany glass artifacts stone tools murals and painted ceramics ethnographic analogy and the distribution of artifacts across space to identify evidence of cooking and food processing left by ancient cooks The Menial Art of Cooking is the first archaeological volume focused on cooking and food preparation in prehistoric and historic settings around the world and will interest archaeologists social anthropologists sociologists and other scholars studying cooking and food preparation or subsistence
