Colonialism Its Forms Of Knowledge:

Colonialism and Its Forms of Knowledge Bernard S. Cohn, 1996-09-08 Bernard Cohn's interest in the construction of Empire as an intellectual and cultural phenomenon has set the agenda for the academic study of modern Indian culture for over two decades. His earlier publications have shown how dramatic British innovations in India including revenue and legal systems led to fundamental structural changes in Indian social relations. This collection of his writings in the last fifteen years discusses areas in which the colonial impact has generally been overlooked. The essays form a multifaceted exploration of the ways in which the British discovery, collection and codification of information about Indian society contributed to colonial cultural hegemony and political control. Cohn argues that the British Orientalists' study of Indian languages was important to the colonial project of control and command. He also asserts that an arena of colonial power that seemed most benign and most susceptible to indigenous influences, mostly law, in fact became responsible for the institutional reactivation of peculiarly British notions about how to regulate a colonial society made up of others. He shows how the very Orientalist imagination that led to brilliant antiquarian collections, archaeological finds and photographic forays were in fact forms of constructing an India that could be better packaged, inferiorized and ruled. A final essay on cloth suggests how clothes have been part of the history of both colonialism and anticolonialism.

Narratives of Colonialism G. R. Knight, 2000 This book examines the interwoven issues of sugar, Java and the Dutch from a broadly post colonial standpoint. Sugar's history forms one of the crucial meta narratives of Western colonialism. The history of the commodity is integral to that long association between cane

sugar and the overseas expansion of the Western powers that had its origins in the Atlantic islands in the fifteenth century. From there it spread to the New World and by the nineteenth century into parts of Asia and the Pacific. The subsequent threat to cane sugar's pre-eminence as a sweetener posed from the mid-nineteenth century onward by sugar made from beet only served to further consolidate that connection. The colonial metropolitan tie with its promise of protective tariffs and a secure home market became more than ever central to the industry's sustained development. In associated mode, colonial states renewed their efforts to subordinate land and labour to sugar's particular requirements. Only in the second half of the twentieth century was the nexus formally broken, leaving cane sugar as an often potent legacy of colonialism for the post-colonial order. The commercial production of cane sugar in Java dated from the first half of the seventeenth century. It took place there until the early nineteenth century under the patronage of the Dutch East India Company and its successors. The actual business of manufacture largely carried on by Chinese settlers was working in rather varied relationships with Javanese workers and peasant farmers. During the mid-nineteenth century decades, however, the industry was transformed. It became the first of its kind in Asia successfully to adopt the panoply of steam, steel and chemistry which formed the technological basis of industrialised sugar manufacturing.
