development a system which while it continued to subordinate the colonial economy displayed three distinct phases each characterised by a unique pattern of domination and surplus extraction a structure where the colonial state was an instrument for subordinating all the social and economic classes of the colony while it served the interests of the metropolitan bourgeoisie      *Thailand at the Margins* Jim Glassman,1999      *Global Development and Colonial Power* Daniel Bendix,2018-03-24 Although Germany was one of the principal colonising nations in Africa and today is the world s second largest aid donor there is no literature on the postcolonial condition of contemporary German development policy This book explores German development endeavours by state institutions as well as NGOs and provides evidence of development policy s unacknowledged entanglement in colonial modes of thought and practice It zooms in on concrete policies and practices in selected fields of intervention development education and billboard advertising in Germany and taking Tanzania as a case in point obstetric care and population control in the Global South The analysis finds that disregarding colonial continuities means to perpetuate the inequalities and injustices that development policy claims to fight This book argues that colonial power in global development needs to be understood as functioning through the transnational character of development policy at home and abroad      **Fundamental Processes and Trends in Contemporary World Developments** Nicolae Ceauşescu,1979
