Color Atlas of Histopathology R. C. Curran, 1985 This revised edition has been rewritten with the emphasis on the changing pattern of disease incidence The illustrations chosen to cover 95% of the lesions which the doctor will encounter in hospital practice cover nearly twice the area of the previous edition and carry more information Curran's Atlas of Histopathology R. C. Curran, J. Crocker, 2000 This is the fourth edition of Professor Curran s well known and widely used colour atlas of histopathology. The text has been completely revised and there have been additional immunohistological images added to the 804 full colour illustrations that make the atlas such a valuable reference text for students and pathologists alike The clarity of the text and the colour balance of the sharply focused illustrations are unique The contents of each illustration were carefully chosen and balanced for the structural importance. The boundaries of the pictures are defined with precision to make sure that very little space is wasted in the tissues. The general arrangement of the contents has been retained with a chapter on each of the main systems or organs of the body There is an introductory chapter of a general nature which demonstrates the more important reactions of the tissues in disease and at the same time teaches the student the basic language of histopathology thereby enabling him or her to read and assess the significance of changes in the tissue as revealed by microscopy Most of the conditions are common or fairly common diseases but occasional rare lesions are included This book is primarily an atlas the primary purpose of which is to convey information in visual form It is meant to complement existing textbooks A new comprehensive index has been prepared for this edition. The book is intended primarily for undergraduate students but experience with its predecessors suggests that it is likely to prove useful to postgraduate students in training in pathology or other clinical disciplines Colour Atlas of Histopathology, 1966 Colour Atlas of **Histopathology** Robert Crowe Curran, 1985 Color Atlas of Pathology Urs-Nikolaus Riede, Martin Werner, 2004-07-14 This pocket atlas is an excellent reference work that presents pathologic findings in all clinically relevant fields using high quality photographs and concise well structured explanatory texts Images include color photos and micrographs Electron microscopic images are included where necessary Clear schematic drawings illustrate procedures such as the course of infections etc Text boxes on clinical and morphological aspects on complications and with easy to remember mnemonic A Colour Atlas of General Pathology Geoffrey Austin Gresham, 1992-11-01 summaries are set off in color Color Atlas and Text of Histology Leslie P.
