*Soviet Bombers of the Second World War* Jason Nicholas Moore,2019-09-08 Soviet bombers were a varied lot during the Second World War ranging from single engined biplanes such as the 1920 s era Polikarpov U 2 to the excellent and modern twin engined Tu 2 medium bomber Although the use of four engined strategic bombers was mostly limited to use of the huge Pe 8 bomber the Soviets used many other aircraft for both strategic and tactical bombing As the bombers of the Red Air Force were mainly tasked with supporting the Red Army most of the bombers were used for tactical bombing attacking tanks troop convoys trains and airfields This book will deal with both strategic bombers and tactical bombers but will concentrate on the smaller tactical bombers as this is where the Red Air Force s emphasis lay Such types as the Il 4 the Su 2 the aforementioned Tu 2 and the most important bomber of all the Il 2 Shturmovik attack bomber will be described in great detail including not only details on the aircraft themselves but how they were deployed in combat The one truly strategic bomber the Pe 8 will not be forgotten and neither will the comparatively tiny U 2 biplane which was so effective in its use as a night time nuisance raider that the Germans copied the tactic wholesale Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers **Soviet Air Force Fighter Colours 1941-1945** Erik Pilawskii,2003 This book represents probably the most detailed study published in the English language of the camouflage and markings of the fighter aircraft of the Soviet Air Force during World War II Erik Pilawskii is a scholar of the Soviet Air Force in World War II and has undertaken several years of research to produce this ground breaking book With information drawn from previously inaccessible Soviet archives the author first presents a detailed analysis of the developments trends patterns and irregularities of the color systems seen on Russian fighters and offers a fascinating insight into the workings of

the Soviet manufacturing system responsible for this task He then brings readers a technical study of each of the main fighter aircraft and variants and each description is followed by coverage of camouflage and markings factory applied field variations and seasonal The text is supported by hundreds of rare and previously unpublished photographs and more than 40 commissioned full color artworks Furthermore hundreds of color illustrations portray the immense variety of patterns related to this fascinating subject This book will be a must have for all students of Soviet air power and Russian aircraft modelers

**The Petlyakov Pe-2** Peter C Smith,2020-03-30 During the Second World War the Soviet Union s Petlyakov Pe 2 \_Peshka\_ dive bomber was unique in that it was as fast as most fighter aircraft This was in a period when it was considered by the RAF that it was impossible for monoplane aircraft to conduct vertical bombing with any degree of success During the war the Pe 2 was the principal dive and light bomber of Russia s air power across the vast Eastern Front and it continued in service until the early 1950s with the air forces of the Warsaw Pact countries and Yugoslavia Conceived by a team of top aircraft designers whom Stalin had incarcerated in a prison camp on trumped up political charges the Pe 2 had originally been designed as a high altitude twin engine fighter plane but due to the outstanding success of the German Stukas in the Blitzkrieg its role was quickly changed to that of a fast dive bomber The Pe 2 arrived in service around the time of the German attack on its hitherto ally Although only a handful had reached front line units by the start of Operation Barbarossa in June 1941 the Pe 2 soon became the main dive bomber in both the Soviet VVS and Naval service Mass production by factories hastily moved back beyond the front meant that numbers increased rapidly and more than 11 000 of the type including many variants were built up to 1945 The Peshka became the mainstay of the Soviet counteroffensive that ultimately resulted in the fall of Berlin Pe 2s also led the way in the brief but annihilating Manchurian campaign against Japan in the closing days of the war in 1945 Using official sources including the official Pe 2 handbook and numerous color and black and white photographs made available to the author from both official and private sources and collections this book is the definitive record of the Pe 2 the dive bomber supreme *Luftwaffe Camouflage and Markings 1933-1945: Pre-war development, paint systems, composition, patterns, applications, day fighters* Kenneth A. Merrick,2004 The study of the Luftwaffe during World War II is still of enormous interest to aviation enthusiasts and modellers This is a definitive study of the Luftwaffe s colours and markings *Italian Aces of World War 2* Giorgio Apostolo,Giovanni Massimello,2012-12-20 Flying aircraft such as the Macchi 200 202 Fiat G 50 and biplane Fiat CR 42 the Italian fighter pilots were recognised by their Allied counterparts as brave opponents blessed with sound flying abilities but employing under gunned and underpowered equipment Following the Italian surrender in September 1943 a number of aces continued to take the fight to the Allies as part of the Luftwaffe run ANR which was equipped with far more potent equipment such as the Bf 109G Macchi 205V and Fiat G 55 Flying these types the handful of ANR squadrons continued to oppose Allied bombing raids on northern Italy until VE Day **The National Union Catalog, Pre-1956 Imprints** ,1974 **Send Me More Paint!** Australian War
