Colour After Klein Rethinking Colour In Modern And Contemporary Art:

Colour After Klein Jane Alison, 2005 This exhibition reassesses the powerful and important place of colour in contemporary art offering a fresh way of experiencing iconic works of painting installation photography and sculpture by some of the most significant artists of the 20th and 21st centuries Louise Bourgeois William Eggleston Anish Kapoor Pipilotti Rist Anri Sala James Turrell and Andy Warhol are among the twenty artists on show *Yves Klein* Nuit Banai, 2014-06-15 Denounced as a charlatan and fêted as a mystic French artist Yves Klein 1928-62 scandalized the art world with his enthusiastic embrace of postwar mass culture and his exploitation of controversial publicity tactics Today we know Yves Klein not only as one of the most radical artists of the postwar period but also as an iconic role model for contemporary practices he reinvented abstract painting conceived new horizons for performance art and was a trailblazer in the realm of land body and conceptual art In this new critical biography Nuit Banai examines the relationship between Klein's brief life and his wide repertoire of artistic practices While surveying the artist's life Banai establishes that Klein's brilliance was above all performative revealing that he created and inhabited myriad public identities bourgeois judo expert painter avant-garde artist collaborator politician fascist and showman among others With each persona Banai shows Klein invented new ways to communicate his paradoxical message of spiritual enlightenment and Dada iconoclasm to a rapt and unsuspecting audience Illuminating the many facets of Klein's influential artistic career Yves Klein is an invaluable introduction to the inventor of the inimitable International Klein Blue *Chromatic Algorithms* Carolyn L. Kane, 2014-08-13 These days we take for granted that our computer screens and even our phones will show us images in vibrant full color Digital color is a fundamental part of how we use our devices but we never give a thought to how it is produced or how it came about *Chromatic Algorithms* reveals the fascinating history behind digital color tracing it from the work of a few brilliant computer scientists and experimentally minded artists in the late 1960s and early 70s through to its appearance in commercial software in the early 1990s Mixing philosophy of technology aesthetics and media analysis Carolyn Kane shows how revolutionary the earliest computer generated colors were built with the massive postwar number crunching machines these first examples of computer art were so fantastic that artists and computer scientists regarded them as psychedelic even revolutionary harbingers of a better future for humans and machines But Kane shows the explosive growth of personal computing and its accompanying need for off the shelf software led to standardization and the gradual closing of the experimental field in which computer artists had thrived Even so the gap between the bright bold presence of color onscreen and the increasing abstraction of its underlying code continues to lure artists and designers from a wide range of fields and Kane draws on their work to pose fascinating questions about the relationships among art code science and media in the twenty first century *Res: Anthropology and Aesthetics, 48: Autumn 2005* Francesco Pellizzi, 2005-12-15 *Res 48* includes the editorial *Between Creation and Destruction* by Finbarr Barry Flood and Zoë Sara Strother *People Have Three Eyes* by
