Houston We Have a Wake-up Call Michelle Graye, *We Are What We Remember* Laura Mattoon D'Amore, Jeffrey Meriwether, 2013-01-16 Commemorative practices are revised and rebuilt based on the spirit of the time in which they are re-created. Historians sometimes imagine that commemoration captures history but actually commemoration creates new narratives about history that allow people to interact with the past in a way that they find meaningful. As our social values change, race, gender, religion, sexuality, class, our commemorations do too. *We Are What We Remember: The American Past Through Commemoration* analyzes current trends in the study of historical memory that are particularly relevant to our own present: our biases, our politics, our contextual moment, and strive to name forgotten, overlooked, and denied pasts in traditional histories. Race, gender, and sexuality, for example, raise questions about our most treasured myths: where were the slaves at Jamestown? How do women or lesbians protect and preserve their own histories when no one else wants to write them? Our current social climate allows us to question authority and especially the authoritative definitions of nation, patriotism, and heroism, and belonging. How do we uncommemorate things that were miscommemorated in the past? How do we repair the damage done by past commemorations? The chapters in this book, contributed by eighteen emerging and established scholars, examine these modern questions that entirely reimagine the landscape of commemoration as it has been practiced and studied before.

*Dark Star* Matthew H. Hersch, 2023-12-26 A captivating history of NASA's Space Transportation System, the space shuttle chronicling the inevitable failures of a doomed design. In *Dark Star*, Matthew Hersch challenges the existing narrative of the most significant human space program of the last 50 years: NASA's space shuttle. He begins with the origins of the space shuttle, a century-long effort to develop a low-cost reusable rocket powered airplane to militarize and commercialize space travel, which Hersch explains was built the wrong way at the wrong time and for all the wrong reasons. Describing the unique circumstances that led to the space shuttle's creation by President Richard Nixon's administration in 1972 and its subsequent flights from 1981 through 2011, Hersch illustrates how the space shuttle was doomed from the start. While most historians have accepted the view that the space shuttle's fatal accidents, including the 1986 Challenger explosion, resulted from deficiencies in NASA's management culture that lulled engineers into a false confidence in the craft, *Dark Star* reveals the widespread understanding that the shuttle was predestined for failure as a technology demonstrator. The vehicle was intended only to give the United States the appearance of a viable human spaceflight program until funds became available to eliminate its obvious flaws. Hersch's work seeks to answer the perilous questions of technological choice that confront every generation and it is a critical read for anyone interested in how we can create a better world through the things we build.
