

Column Flotation Cell

As an integral part of a flotation circuit, column flotation is highly effective in producing high-quality product, offering superior recovery of fine materials. Through proper column sizing and design, this technology complements mechanical cells and improves overall flotation circuit performance.

FLSmidth's column flotation technology is rooted in the original Ektaco Pyramid™ brand, with a supply legacy dating back to the 1980s. Our modernised product line offers improved metallurgical performance and modular, customisable designs through our configure-to-order (CTO) program, designed to fit the individual needs of each process.

Our unique column flotation design utilises externally mounted spargers to facilitate bubble particle contacting in a high-shear environment. Through froth washing, our Column Flotation Cells offer advanced performance and consistently produce a high-grade product.

Key benefits

- Maximised product recovery through ideal hydrodynamic environment
- Improved material grade due to effective froth washing
- High contact with lowest energy input, via innovative sparger system
- Reduced CAPEX costs, shorter delivery times and enhanced circuit functionality through modular CTO design
- Improved froth recovery, reduced utility and pumping demands, from optimised column cell design elements
