## Combinatorial Analysis Proc Of Sym Volume 1:

**The Mathematics of Paul Erdős II** Ronald L. Graham, Jaroslav Nešetřil, 2012-12-06 In 1992 when Paul Erdős was awarded a Doctor Honoris Causa by Charles University in Prague a small conference was held bringing together a distinguished group of researchers with interests spanning a variety of fields related to Erdős' own work. At that gathering the idea occurred to several of us that it might be quite appropriate at this point in Erdős' career to solicit a collection of articles illustrating various aspects of Erdős' mathematical life and work. The response to our solicitation was immediate and overwhelming and these volumes are the result. Regarding the organization we found it convenient to arrange the papers into six chapters each mirroring Erdős' holistic approach to mathematics. Our goal was not merely a random collection of papers but rather a thoroughly edited volume composed in large part by articles explicitly solicited to illustrate interesting aspects of Erdős and his life and work. Each chapter includes an introduction which often presents a sample of related Erdős problems in his own words. All these sometimes lengthy introductions were written jointly by editors. We wish to thank the nearly 70 contributors for their outstanding efforts and their patience. In particular we are grateful to Bela Bollobás for his extensive documentation of Paul Erdős' early years and mathematical high points in the first part of this volume; our other authors are acknowledged in their respective chapters. We also want to thank A. Bondy, G. Hahn, I.
