

## Why psychologist prefer the term psychological disorder than mental disorder?

- The major reason is that the term psychological disorder puts the study of abnormal behavior squarely within the purview of the field of psychology.
- **Mental disorder** (also called **mental illness**) is derived from the medical model perspective that views abnormal behavior patterns as symptoms of underlying illness. Although the medical model is a major contemporary model for understanding abnormal behavior, we believe we need to take a broader view of abnormal behavior by incorporating psychological and sociocultural perspectives as well.
