our time including Jaroslava Brychtova Dale Chihuly Dan Dailey Stanislav Libensky William Morris Tom Patti Lino Tagliapietra and many others William Warmus identifies four prominent themes in the relatively recent development of studio glass since 1960 that provide a framework for exploring the rich variety of works presented in this book The first theme is what Warmus has called the particular affinity between nature and the making of glass Where nature creates a heart the glass artist creates a heart felt vessel The second is the ability of glass equally to that of painting and sculpture to convey the power of abstraction and color A third theme is the prevalent use of glass sometimes called the new bronze to depict the human figure and animal forms The final section deals with the theatrical nature of installations and environmental sculptures demonstrating the surprising capability of glass to impose itself physically and emotionally on the space we inhabit altering our very perception of it ancient Egypt and places contemporary glass within the context of contemporary art and theory at large In addition the book includes selected artists bibliographies and a chronological bibliography of contemporary glass that lists key historical events general trends and developments and important publications Fire and Form offers a unique perspective on this vital and intoxicating medium and its publication is a welcome event for all lovers of glass those who make it those who collect it and those who admire it **The Persistence of Craft**
