## **Contemporary Research In Population Geography:**

**Contemporary Research in Population Geography** John Stillwell, Henk J. Scholten, 2012-12-06 Significant changes have occurred in the structural composition and geographical distribution of the populations of North West European countries during the 1970s and 1980s. Whilst the subject matter of this volume reflects many of the important themes of research activity that have preoccupied British and Dutch spatial demographers and population geographers over the last decade, the structure of the book aims to facilitate comparison of those selected themes between the United Kingdom and the Netherlands. The book has gradually taken shape over the period of time since the conference in Oxford in 1986 when the contents were first presented. We are very grateful for the assistance that we have received during the production process from Marjie Salisbury, Tim Hadwin and John Dixon at the School of Geography, University of Leeds; from Annemieke Perquin at the National Physical Planning Agency in The Hague; and from Evert Meijer, Elmy Heuvelmans and Berry van Houten at GEODAN in Amsterdam. We also wish to acknowledge the contributions to the field of population geography that have been made in recent years by John Coward who died so tragically in the Kegworth air disaster earlier this year.

*Making Population Geography* Adrian Bailey, 2014-05-01 *Making Population Geography* is a lively account of the intellectual history of population geography, arguing that while population geography may drift in and out of fashion, it must continue to supplement its demographic approach with a renewed emphasis on cultural and political accounts of compelling population topics such as HIV/AIDS, sex trafficking, teen pregnancy, citizenship and global ageing, in order for it to shed light on contemporary society. *Making Population Geography* draws both on the writings of those like Wilbur Zelinsky and Pat Guber who were at the very epicentre of spatial science in the 1960s and those like Michael Brown and Yvonne Underhill, whose post-punk introspections of method, content and purpose now push the field in new directions. Using a wide range of case studies, contemporary examples and current research, the book links the rise and fall of the key concepts in population geography to the changing social and economic context and to geographers' turn towards social theory. Referencing the authors' classroom experiences both in the US and the UK, *Making Population Geography* will appeal to students studying geography, population issues and the development of critical scholarship.

*Population Geography: Progress & Prospect (Routledge Revivals)* Michael Pacione, 2013-10-14 First published in 1986, this book presents a comprehensive overview of the contemporary state of knowledge in the field of population geography. It discusses the contemporary state of the art and surveys new research developments and new thinking in the major branches of the subject. It thereby provides an introductory guide to contemporary trends and forms a reference point for future development in the subject.
