Faull, 2004 How we view the foreign presented either in the interrelated forms of culture language or text determines to a large degree the way in which we translate This volume of essays examines the cultural politics of translation that have determined the production and dissemination of the foreign in domestic cultures as varied as contemporary North America Europe and Israel The essays address from a variety of theoretical perspectives the question posed almost two hundred years ago by the German philosopher Friedrich Schleiermacher of whether the translator should foreignize the domestic or domesticate the foreign

Translation and Empire Douglas Robinson, 2014-04-08 Arising from cultural anthropology in the late 1980s and early 1990s postcolonial translation theory is based on the observation that translation has often served as an important channel of empire Douglas Robinson begins with a general presentation of postcolonial theory examines current theories of the power differentials that control what gets translated and how and traces the historical development of postcolonial thought about translation He also explores the negative and positive impact of translation in the postcolonial context reviewing various critiques of postcolonial translation theory and providing a glossary of key words The result is a clear and useful guide to some of the most complex and critical issues in contemporary translation studies *Contemporary German Prose in Britain and France (1980-1999)* Wiebke Sievers, 2007 This case study of the translation of contemporary German literature in Britain and France seeks to address the philosophical and anthropological problem of otherness and to discover its significance for translation theory This work should appeal to scholars interested in German British and French literature translation theory philosophy and sociology central component of the translation process Moreover via disciplines such as philosophy and anthropology otherness in the last two decades has entered Western theories and studies of translation and become an important analytical and normative category in the field of translation studies Nevertheless there is an apparent lack of research considering the concept itself as well as its history and current use in the field and its relevance for the practice of translation the translation theories currently known as foreignizing and shows that some of these draw on the same nationalist agenda that they try to transcend Moreover the ensuing case study proves that current translation practice is still governed by a nationalist assurance of linguistic and cultural differences This book therefore concludes by calling for a change of perspective in the theoretical and practical approaches to translation Translation should no longer be regarded as a means of delimiting our selves from a national other but as a way to uncover the otherness underlying these alleged selves

Deconstruction and Translation Kathleen Davis, 2014-07-22 Deconstruction and Translation explains ways in which many practical and theoretical problems of translation can be rethought in the light of insights from the French philosopher Jacques Derrida If there is no one origin no transcendent meaning and thus no stable source text we can no longer talk of translation as meaning transfer or as passive reproduction Kathleen Davis instead refers to the translator's freedom and

individual responsibility Her survey of this complex field begins from an analysis of the proper name as a model for the problem of signification and explains revised concepts of limits singularity generality definitions of text writing iterability meaning and intention The implications for translation theory are then elaborated complicating the desire for translatability and incorporating sharp critique of linguistic and communicative approaches to translation The practical import of this approach is shown in analyses of the ways Derrida has been translated into English In all the text offers orientation and guidance through some of the most conceptually demanding and rewarding fields of contemporary translation theory
