Science Education as a Pathway to Teaching Language Literacy ,2010-01-01 In this era of mandated high stakes and standardized testing teachers and schools officials find themselves struggling to meet the demands for improved student achievement At the same time they are also expected to teach all subjects as required by national and state curriculum standards Because of these competing demands science is not even taught or taught less often in order to make more room for mathematics and language arts drill and practice and teaching to the test Anyone concerned with providing students with a well rounded education should ask whether these drastic measures even if they were to show improvement in achievement justify denying children access to the unique opportunities for intellectual growth and social awareness that the effective instruction of science provides Will these students have enough exposure to the science curriculum to prepare them to do

well later in middle and high school How is this current situation going to help ameliorate the pervasive achievement gap in science and how is it going to motivate students to pursue science related careers The authors of this book believe that instead of sacrificing the science curriculum to make more time for drill and practice in mathematics and language arts what should be done is to connect current research on literacy and science instruction with effective pedagogy Therefore this volume provides fresh theoretical insights and practical applications for better understanding how science can be used as a pathway to teaching literacy and hence as a pathway to improving teachers practice and students learning

The World of Science Education, 2009-01-01 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel North Africa and the Middle East and Sub Saharan Africa The focus of this Handbook is on Australasia a region loosely recognized as that which includes Australia and New Zealand plus nearby Pacific nations such as Papua New Guinea Solomon Islands Fiji Tonga Vanuatu and the Samoan islands science education and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in Australasian rather than international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers review what has been done and accomplished what is missing and what might be done next

Elementary Science Methods: A Constructivist Approach David Martin, 2005-07-22 In this pioneering text Martin uses a constructivist approach to guide students in learning how to teach in a constructivist manner Grounded in the belief that it is more important for children to learn how to do science than it is for them to learn about science this text is predicated on the reality that teachers of elementary science do not need to know a great deal of science to be good science teachers but need to be co inquirers with their students To facilitate your students learning this text features a wealth of exercises for teacher candidates the book includes open ended inquiry activities that help them to construct their own personal conceptualizations about science content and teaching science in the elementary school and it contains over 170 process oriented open ended activities that teachers can use to encourage children to develop and perform their own investigations The Book Companion CD ROM included with each new copy provides tools and resources such as additional activities and video which students can use both in their college course and later in elementary science classrooms All activities are linked to National Science Education Standards for content professional development assessment and teaching and the activities contain suggestions of appropriate children s literature Important Notice Media content referenced within the product description or the product text may not be available in the ebook version
