Contested Identities Roger Nicholson, Gertrud Szamosi, Claudia Marquis, 2015-09-04 This volume brings together essays that individually and collectively address the force of the literary text with regard to problematic identities They work out of shared concerns with literary representations of this issue in different regions nations and communities that often prove divided they pursue questions related to textual identity where the literary text itself is contested internally or in its generic and historical relations In sum these studies actively test identity as social or literary concept discovering in difference the very condition of a useful if paradoxical sense of personal or textual coherence What happens to us when we move between different cultures or different societies defined in geographical or historical terms What happens to texts and textual practices in these same circumstances What happens to us when we are obliged to adapt to a new social order Homi Bhabha speaks of cultural difference as calling into play what he calls cultural translation What happens to identity the narrative that fashions a continued sense of self in this case Difference raised to alterity demands that we accord functional and philosophical value not just to other aspects but also to the aspect of the other At the level of personal or textual agency however difference contests and threatens to subvert stable selfhood composing a scene of conflict Even so it often proves to be instrumental in re charging a sense of the cultural valence of the literary text not least by virtue of its political implications In this regard the border where difference materialises has considerable presence in contributions to this volume prompting appreciation of texts that work on or travel across such borders however haphazardly and dangerously but also those that compose border textualities

Contested Identities Peter Loizos, Evthymios Papataxiarchis, 2016-09-29 In this collection leading anthropologists provide a comprehensive yet highly nuanced view of what it means to be a Greek man or woman married or unmarried functioning within a complex society based on kinship ties Exploring the ways in which sexual identity is constructed these authors discuss for example how going out for coffee embodies dominant ideas about female sexuality moral virtue and autonomy why men in a Lesbos village maintain elaborate friendships with nonfamily members while the women do not why young housewives often participate in conflict resolution rituals and how the dominant role of mature married householders is challenged by unmarried persons who emphasize spontaneity and personal autonomy This collection demonstrates that kinship and gender identities in Greece are not unitary and fixed kinship is organized in several highly specific forms and gender identities are plural competing antagonistic and are continually being redefined by contexts and social change

Communication and Conflict Transformation through Local, Regional, and Global Engagement Peter M. Kellett, Thomas G.
