G. Kendrew, 2017-12-13 Excerpt from *The Climates of the Continents* A work of this kind must be essentially a compilation from such materials as statistics more or less adequate maps showing certain factors of climate and regional descriptions the result is largely dependent on the nature of the original sources A glance at the following pages will show that no uniformity of treatment has been achieved or even attempted The principle followed has been to present the main features of the climate of each region considered especially in relation to the greater units of the globe It is clearly impossible to give any detailed local descriptions in a book of this scope But it is hoped that the general account may constitute a framework into which detailed local descriptions may be intelligently fitted a convenient skeleton to carry the details necessary for the special purposes of the meteorologist the botanist the zoologist and the geographer As it seemed desirable to make each chapter as far as possible complete in itself repetition has been in some places inevitable About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Climates of the Continents* W.
