Contractarianism And Rational Choice Essays On David Gauthiers Morals By Agreement:

Contractarianism and Rational Choice Peter Vallentyne, 1991-01-25 David Gauthier's *Morals by Agreement* 1986 is the most complete and suggestive contractarian theory of morality since the work of Rawls. In this anthology a number of prominent moral and political philosophers offer a critical assessment of Gauthier's theory and its three main projects: developing a contractarian foundation for morality, defending a theory of rational choice, and supporting the claim that rationality requires one to keep one's agreements. An introduction sets out Gauthier's project while Gauthier himself has the last word responding to the critiques. This collection will interest moral and political philosophers, social theorists, and specialists in the philosophy and theory of law as well as management sciences. *Modern Social Contract Theory* Albert Weale, 2020 This volume offers an exposition and evaluation of major work in social contract theory from 1950 to the present.

Compromise Alin Fumurescu, 2013-02-11 This book offers for the first time a conceptual history of compromise. Alin Fumurescu combines contextual historical analysis of daily parlance and a survey of the usage of the word from the end of the sixteenth century to the beginning of the eighteenth century in both French and English, with an analysis of canonical texts in the history of political thought. This book fills a significant gap in the literature about compromise and demonstrates the connection between different understandings of compromise and corresponding differences in understandings of political representation. In addition, Fumurescu addresses two controversial contemporary debates about when compromise is beneficial and when it should be avoided at all costs. A better understanding of the genealogy of compromise offers new venues for rethinking basic assumptions regarding political representation and the relationship between individuals and politics.

Exploitation Ruth J. Sample, 2003 Exploitation locates what it is we recognize as bad when we judge a situation to be exploitative. Ideal for courses in social and political philosophy, public policy, or political science. *Contractarian*

Liberal Ethics and the Theory of Rational Choice Jung Soon Park, 1992 This book investigates the relationship between morality and rationality in the context of historical and present-day contractarian ethics. From Rawls to Gauthier, contractarians have attempted to construct their methodological foundations on the theory of rational choice. Through a careful study of the nature and limits of the theory of rational choice, Jung Soon Park argues that the theory cannot provide the reliable foundations for contractarian liberal ethics. Consequently, the author takes seriously the question about the future of contractarian liberal ethics: Is it the end, or can there be a transformation?

Strategic Justice Peter Vanderschraaf, 2018-11-23 In *Strategic Justice*, Peter Vanderschraaf argues that justice can be properly understood as a body of special social conventions. The idea that justice is at bottom conventional has ancient roots but has never been central in philosophy because convention itself has historically been so poorly understood. Vanderschraaf gives a new defense of this idea that integrates insights and arguments of past masters of moral and political philosophy together with recent analytical and empirical concepts and results from the social sciences. One of the substantial contributions of this work is a new account

of convention that is sufficiently general for summarizing problems of justice the social interactions where the interests of the agents involved diverge Conventions are defined as equilibrium solutions to the games that summarize social interactions having a variety of possible stable resolutions and a corresponding plurality of equilibria The basic idea that justice consists of a system of rules for mutual advantage is explored in depth using this game theoretic analysis of convention Justice is analyzed as a system of conventions that are stable with respect to renegotiation in the face of societal changes such as resource depletion technological innovation and population decline or growth This new account of justice as convention explains in a cogent and natural way what justice is and why individuals have good reason to obey its requirements Contrary to what many have thought this new account shows how the justice as convention view can give a good account of why justice requires that the most vulnerable members of society receive protections and benefits from the cooperative surplus created by general compliance with justice

Rationality, Morality, and Self-interest John Heil, 1993 Distinguished

philosophers address questions pertaining to the character of human reason and the relation of reason to action and belief

Morality and Agreement Paul Voice, 2002 This book argues for moral contractarianism the view that moral justification rests on the idea of agreement It critically appraises the views of contemporary contractarians such as John Rawls David Gauthier and Thomas Scanlon It argues for a theory of moral justification that is based on a hypothetical agreement of restricted scope between strangers in the circumstances of justice and that is bound by historical place and circumstance

Rationality, Justice and the Social Contract David P. Gauthier, Robert Sugden, 1993 Here a group of philosophers economists and political theorists discuss the work of David Gauthier which seeks to show that rational individuals would accept certain moral constraints on their choices The possibilities and limitations of a contractarian approach to issues of justice is analyzed

Yale Journal of Law & the Humanities, 1999 Social Theory and Practice, 2017-04 Moral Dealing David Gauthier, 2019-05-15 David Gauthier is one of the most outstanding and influential philosophers working in moral theory today and his book *Morals by Agreement* 1986 has established him as a preeminent defender of contractarian moral theory This volume brings together a selection of his best essays on contractarianism many of which have become difficult to find

Contract Ethics Howard Kahane, 1995 Recent theorists have suggested that human altruism toward non family members evolved because of the tremendous benefits of reciprocity Developing further the notion that evolutionary theory can help to explain moral sentiments Howard Kahane proposes that a sense of fair play is essential to ethics and argues that moral obligation too narrowly construed prevents us from living rationally He brings his account of fair play to bear on the ethics of various domains of social life including friendship taxes civil rights and nation states

Ethics Oliver A. Johnson, Andrews Reath, 2004 Western tradition from Plato to John Rawls and other contemporary writers Chronologically

oriented the book's unbiased and comprehensive coverage fosters a firm grasp of many seminal ideas and thinkers in the history of Western ethics. This latest edition of Johnson's classic anthology features a significant revision of Part III: The Contemporary Period. In addition to providing a historical introduction to moral philosophy, the book now provides a very timely introduction to the main currents in contemporary moral philosophy such as contemporary deontology, Kantianism, consequentialism, contractarianism, and virtue theory. Newly added contemporary readings that articulate well with the classical sources demonstrate the continuity between historical and contemporary concerns, for example, showing how the ideas of the classical writers have been taken up and developed by contemporary philosophers.

Moral Knowledge? Walter Sinnott-Armstrong, Mark Timmons, 1996. *Moral Knowledge* is a collection of specially commissioned papers, each presenting a major position within the field of moral epistemology. Chapters start by introducing readers to the position the author defends, locating this position vis-à-vis competing views and explaining technical vocabulary before arguing that position. Topics covered include moral skepticism, moral truth, projectivism, contractarianism, coherentism, feminist views, quasi-realism, and pragmatism. Most authors are established philosophers in the field.
