Contractual Correspondence For Architects And Project Managers:

Contractual Correspondence for Architects and Project Managers David Chappell, 2006-03-16 This book provides over 160 model letters with commentary for use with all the main JCT 2005 building contracts. It concentrates on problems which can arise during a project and draws on the author's extensive experience as a contracts consultant. It is a companion to the author's *Standard Letters in Architectural Practice* which covers more routine matters. The revised Fourth Edition takes account of the 2005 editions of the JCT Standard Building Contract, the Intermediate Building Contract and the Minor Works Building Contract both with their contractor's design versions ICD and MWD, the 2004 updates of the Standard Form of Agreement for the Appointment of an Architect, changes to case law since the last edition was published in 1996. It will be an invaluable guide for architects, building surveyors and project managers. Architect's Legal Handbook Anthony

Speaight, 2010-05-14 *Architect's Legal Handbook* is the most widely used reference on the law for architects in practice and the established leading textbook on law for architectural students. The ninth edition includes all the latest development in the law that affect an architect's work and comprehensive coverage of relevant UK law topics. Most significantly, the chapter on the JCT contracts has been completely revised to cover the 2005 update. Contributions by the foremost legal and architectural experts in the UK. Full coverage of the JCT 2005 update. New chapter on procurement. Selected bibliography provides useful references to further reading. Tables of Cases, Statutes and Statutory Instruments provide full referencing for cited cases. *Architect's Legal Handbook* is the essential legal reference work for all architects and students of architecture.

The Architect in Practice David Chappell, Andrew Willis, 2013-02-05 *The Architect in Practice* was first published in 1952. Originally written by a quantity surveyor and an architect, it has remained through its nine editions a leading textbook used in the education of architects world wide. While the format of the book has developed, the message and philosophy remains the same as the original, to provide the student of architecture and the young practitioner with a readable guide to the profession, outlining an architect's duties to client and contractor, the key aspects of running a building contract and the essentials of management, finance and drawing office procedure. The tenth edition follows in that tradition. The authors, still an architect and a quantity surveyor, have brought the text fully up to date. Major revisions in this edition include: Revised sections on Planning and the Building Regulations; Changes to the education of architects in the UK; have been detailed; Discussion of the new ARB Architects Code; Standards of Professional Conduct and Practice which came into force in January 2010; The commentary on the RIBA Standard Form for the Appointment of an Architect 1999 SFA 99 has been updated; The latest RIBA Standard Agreement 2010 S 10 A is now discussed; All references to JCT contracts have been updated to refer to the latest revisions of the 2005 suite of contracts; Now also includes reference to education registration and CPD requirements of the Royal Institute of the Architects of Ireland. The tenth edition of *The Architect in Practice* will continue to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession. **Building**
