Contradictions Of Consumption:

Contradictions of Consumption Tim Edwards, 2000 A critical introduction to the field that manages to be both considered and argumentative and stands out distinctly from the more culturalist alternatives available it should provide a strong text for undergraduate courses Don Slater Goldsmiths College University of London How has consumer society developed What are the social divisions politics and policies associated with consumption How do consumer practices have social significance This lively and accessible text shows how consumption is increasingly important in dominating our individual lives and indeed the entire development and direction of contemporary society nationally and internationally Consumption is inherently contradictory in its nature and meaning The most rapturous form of shopping for example clothes purchasing on unlimited plastic in a shopping mall may turn into the most tortuous as the shopper tires the clothes don't fit and the car park is cramped Tim Edwards argues that the practice of consumption itself and consumer society more widely is often socially divisive and iniquitous and examines the extent to which consumer power is real or illusory He provides a thorough analysis and critique of the theories practices and politics of consumer society In particular this book addresses the social divisions of consumption through topics such as fashion advertising and marketing as well as more classical and contemporary theories of consumer society It will appeal to a wide range of students in sociology cultural studies social policy and the politics of identity

Contradictions in Food Consumption Hanna Leipämaa-Leskinen, 2015 This study asked consumers to identify the possible contradictions in their food consumption The article takes the so called antinomies of taste health vs indulgence convenience vs care extravagance vs economy novelty vs tradition and together vs alone by Warde and Mäkelä as a starting point The empirical part of the research analyses between which opposing poles the contradictions emerge when the consumers themselves are asked Findings from a survey 745 respondents indicate that consumers prefer to engage in food related activities that would be more aesthetic healthful tasty convenient caring and economic but state significant barriers for not being able to fulfil these desires Finally the article draws theoretical conclusions about the connections between the prevailing food consumption related contradictions and contemporary consumer society Anthropologica, 2004

Handbook of Social Problems George Ritzer, 2004 Ritzer's Handbook of Social Problems offers a comprehensive treatment of today's major societal issues The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike The international coverage is most welcome in this time of intensifying global inequalities Nancy Jurik Arizona State University The Handbook of Social Problems A Comparative International Perspective provides a unique broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world Editor George Ritzer along with leading U.S. and international sociologists examines the relationship between social problems and a society's level of development and affluence The essays in this volume focus on four interrelated issues involved in the relationship between social problems and

the level of development and affluence Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies It is only with affluence that certain things can come to be imagined as social problems such as excessive consumption The very affluence of a society makes it vulnerable to problems that would not be social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library

Rationality and Irrationality in Economics Maurice Godelier, 2014-07-08 This book is the result of a research project begun by the author in 1958 with the aim of answering two questions First what is the rationality of the economic systems that appear and disappear throughout history in other words what is their hidden logic and the underlying necessity for them to exist or to have existed Second what are the conditions for a rational understanding of these systems in other words for a fully developed comparative economic science The field of investigation opened up by these two questions is vast touching on the foundations of social reality and on how to understand them The author being a Marxist sought the answers as he writes not in philosophy or by philosophical means but in and through examining the knowledge accumulated by the sciences The stages of his journey from philosophy to economics and then to anthropology are indicated by the divisions of his book Godelier rejects at the outset any attempt to tackle the question of rationality or irrationality of economic science and of economic realities from the angle of an a priori idea a speculative definition of what is rational Such an approach can yield only he feels an ideological result Rather he treats the appearance and disappearance of social and economic systems in history as being governed by a necessity wholly internal to the concrete structures of social life

China Report ,1984 **Economic Philosophy** Joan Robinson,2017-09-29 Economics has always been partly a vehicle for the ruling ideology of each period as well as partly a method of scientific investigation It limps along with one foot in untested hypotheses and the other in untestable slogans Here our task is to sort out as best we may this mixture of ideology and science With these provocative words Joan Robinson introduces this lively and iconoclastic book In what follows she says this theme is illustrated by reference to one or two of the leading ideas of the economists from Adam Smith onwards not in a learned manner tracing the development of thought nor historically to show how ideas arose out of the problems of each age but rather an attempt to puzzle out the mysterious way that metaphysical propositions without any logical content can yet be a powerful influence on thought and action Robinson is responsible for some of the most austere professional contributions to economic theory but here in effect she takes the reader behind the scenes and cheerfully exposes the dogmatic content of economic orthodoxy In its place she offers the possibility that with obsolete metaphysics cleared out of the way economics can make a substantial advance toward science Cotton ,1919 **Telos** ,1976 **Report and Proceedings of the World Economic Conference Held at Geneva, May 4th to 23rd, 1927 ...** ,1927
