Contre La Methods Esquibe Dune Theorie Anarchiste De La Connaissance:

Theology and Conversation Jacques Haers, P. De Mey, 2003 This collection of articles presents the main contributions to the third LEST Louvain Encounters in Systematic Theology conference held at the KU Leuven's Faculty of Theology November 2001 Its theme Theology and Conversation Towards a Relational Theology continues the explorations in contemporary theology as set out in the 1997 LEST I conference on The Myriad Christ BETL 152 and in the 1999 LEST II conference on Sacramental Presence in Postmodern Context BETL 160 In LEST III also the plurality and diversity of theological approaches play a major role and the question is raised whether the contemporary theological endeavour in a global world contains in itself the tools to respectfully and constructively approach this diversity The ideas of relation and conversation as found in the theologies of the Trinity and of creation as presupposed in ecclesial praxis and as articulated in reflections that take their bearings from spiritual experience provide a powerful means for renewed theological reflection capable of confronting plurality and diversity

La-préhension du réel Andre Coret, 2021-09-01 Le réel est réellement non représentable telle est la découverte majeure que les scientifiques et les physiciens en particulier ont faite pour leur compte au cours du XXe siècle Mais le savent-ils The real is really unrepresentable this is the major discovery that scientists and physicists in particular have made on their own during the twentieth century

Knowledge, Science and Relativism P. K. Feyerabend, 1999-05-27 This collection of Feyerabend's philosophical papers gathers together work originally published between 1960 and 1980

Readings in Methodology Jean-Bernard Ouedraogo, Carlos Cardoso, 2011-12-15 One of the weaknesses of research in Africa is the little consideration that is given to questions of epistemology and methodology What we see is the trivialization of research protocols which consequently are reduced to fantasy prescriptions that detach social studies from universal debates over the validity of science rather than an interrogation of research procedures induced by the complexity of social dynamics As a result social sciences have become an imitative discourse and a recital of exotic anecdotes without perspectives Knowledge production therefore loses any heuristic bearing It is on the basis of this reality that attempts to correct this tendency have been made in this book by discussing the methodological foundation of social science knowledge This volume is a collection of papers presented during methodological workshops organized by CODESRIA Its objective is to revitalize theory and methodology in field work in Africa while contributing to the creation of a critical space hinged upon the mastery of epistemological bases which are indispensable to any scientific imagination Far from being a collection of technical certainties and certified methods this book interrogates the uncertain itinerary of the process of social logic discovery In that sense it is a decisive step towards a critical systemization of ongoing theories and practices within the African scientific community The reader can therefore identify the philosophical historical sociological and anthropological foundations of object construction field data exploitation and research results delivery This book explains the importance of the philosophical and social modalities of scientific practice the influence of local historical

contexts the different usages of new investigative tools including the audiovisual tools Finally the book backed by classical theories serves as an invitation toward considering scientific commitment to African field research from a reflective perspective
