

Measures to Control Population Growth in India

Population of India is quite large and rapidly increasing. One per cent growth rate means an addition of 1 crore people every year.

Effective population control measures are the need of the hour. We know that birth rate is mainly responsible for rapid population growth.

Hence measures which can reduce the birth rate should be adopted. These measures can be classified into 3 heads.

Social Measures -

Population explosion is a social problem and it is deeply rooted in the society. So efforts must be done to remove the social pressures in the country.

1. Minimum age of Marriage:

Fertility depends on the age of marriage. The minimum age of marriage should be strictly enforced. In India minimum age for marriage is 21 years for men and 18 years for women have been fixed by law. This law should be firmly implemented and people should also be made aware of this through publicity.
