Building Natural Language Processing NLP solutions that deliver ongoing business value is not straightforward

This book provides clarity and guidance on how to design develop deploy and maintain NLP solutions that address real world business problems

In this book we discuss the main challenges and pitfalls encountered when building

NLP solutions We also outline how technical choices interact with and are impacted by data tools the business goals and integration between human experts and the artificial intelligence AI solution The best practices we cover here do not depend on cutting edge modeling algorithms or the architectural flavor of the month We provide practical advice for NLP solutions that are adaptable to the solution s specific technical building blocks Through providing best practices across the lifecycle of NLP development this handbook will help organizations particularly technical teams use critical thinking to understand how when and why to build NLP solutions what the common challenges are and how to address or avoid those challenges These best practices help organizations deliver consistent value to their stakeholders and deliver on the promise of AI and NLP A code companion for the book is available here <https://github.com/TeachingComputersToRead/TC2R-CodeCompanion>
