god tradition where by borrowing a small sum of blessed fortune money and returning it with interest within a year a temple's deity may intervene in the recipient's life bringing them unearned good luck and good fortune. Comprising an in-depth ethnography based on a decade of research, the book explores Taiwan's money god tradition, revealing its ritual culture and underlying beliefs thoroughly analyzed from sociological, comparative, historical, geographic, Taoist, Buddhist, metaphysical, and philosophical contexts. Drawing on Taoist and Buddhist cosmology, Chinese afterlife beliefs, and a trust in the power of the gods to influence the material world, the narrative explores the subjective nature of luck and fate of human desires, choices, and decisions, and of individuals' subjective understandings of what the universe contains. These factors all contribute to the book's final question: which, through an exploration of human deity interactions, investigates whether Jacques Derrida's true unreciprocal gift exists on a transcendent level amid the religious exchanges within Taiwan's money god tradition. This will be a valuable resource for students and scholars of Chinese religion and Taiwanese culture, as well as those with an interest in East Asian philosophy and religion.

and products no longer need to avoid intrusive advertising. Instead, in this new advertising paradigm, they seek out brands and their advertisements to form a positive emotional connection. This intimate bond benefits both the brand and the consumer, acting as a loudspeaker for the brand's values and message. In this context, creativity and professional creatives are reaffirmed as the key differentiators for modern advertising agencies. These agencies need well-trained professionals who are not afraid to use new communication methods, including entertainment and emerging technologies like AI, which, despite being unregulated, are here to stay. AI Impacts on Branded Entertainment and Advertising explores the scientific foundations on the use of AI and branded content, understanding it as an essential tandem for the understanding of the advertising and social reality. Covering topics such as non-conventional media, influencer marketing, and avatar, this book is an excellent resource for marketing directors, brand creators, communication professionals, computer developers, corporate professionals, researchers, scholars, professionals, academicians, and more.
