*The Executive's How-To Guide to Automation* George E. Danner, 2018-12-17 From driverless cars to pilotless planes many functions that have previously required human labor can now be performed using artificial intelligence For businesses this use of AI results in reduced labor costs and even more important creating a competitive advantage How does one look at any organization and begin the work of automating it in sensible ways This book provides the blueprint for automating critical business functions of all kinds It outlines the skills and technologies that must be brought to bear on replicating human like thinking and judgment in the form of algorithms Many believe that algorithm design is the exclusive purview of computer scientists and experienced programmers This book aims to dispel that notion An algorithm is merely a set of rules and anyone with the ability to envision how different components of a business can interact with other components already has the ability to work in algorithms Though many fear that the use of automation in business means human labor will no longer be needed the author argues that organizations will re purpose humans into different roles under the banner of automation not simply get rid of them He also identifies parts of business that are best targeted for automation This book will arm business people with the tools needed to automate companies making them perform better move faster operate cheaper and provide great lasting value to investors

**Power and Prediction** Ajay Agrawal, Joshua Gans, Avi Goldfarb, 2022-11-15 Disruption resulting from the proliferation of AI is coming The authors of the bestselling *Prediction Machines* can help you prepare Artificial intelligence AI has impacted many industries around the world banking and finance pharmaceuticals automotive medical technology manufacturing and retail But it has only just begun its odyssey toward cheaper better and faster predictions that drive strategic business decisions When prediction is taken to the max industries transform and with such transformation comes disruption What is at the root of this In their bestselling first book *Prediction Machines* eminent economists Ajay Agrawal Joshua Gans and Avi Goldfarb explained the simple yet game changing economics of AI Now in *Power and Prediction* they go deeper examining the most basic unit of analysis the decision The authors explain that the two key decision making ingredients are prediction and judgment and we perform both together in our minds often without realizing it The rise of AI is shifting prediction from humans to machines relieving people from this cognitive load while increasing the speed and accuracy of decisions This sets the stage for a flourishing of new decisions and has profound implications for system level innovation Redesigning systems of interdependent decisions takes time many industries are in the quiet before the storm but when these new systems emerge they can be disruptive on a global scale Decision making confers power In industry power confers profits in society power confers control This process will have winners and losers and the authors show how businesses can leverage opportunities as well as protect their positions Filled with illuminating insights rich examples and practical advice *Power and Prediction* is the must read guide for any business leader or policymaker on how to make the coming AI disruptions work for you rather than against you
