The Future of No Work Filip Drimalka, 2024-01-01 We have been told for ages that technology would make our lives easier. Instead, we increasingly find ourselves drowning in tedious tasks and feeling trapped in the daily grind, overflowing calendars, endless to-do lists, and a never-ending stream of interruptions. And since we're always connected, our work never seems to end. Imagine a world where technology finally starts taking care of all the boring stuff so you can focus on what really matters to you. Where smart AI apps empower you to create anything you can imagine and even things you never would have thought of. Where you have the power to redesign work around your life, not the other way around. This is the era of No Work. It's not about escaping work but about using our skills and leveraging the possibilities unlocked by AI so that our days are primarily comprised of the things we are passionate about. Because that's how we can create something extraordinary. Inside this book, you'll find hundreds of practical examples and tips: How to find, select, and use the right digital tools for anything you do. How to make your productivity skyrocket with AI and reclaim your time. How to do things your way with greater freedom by automating more tasks. How to craft the work you want, whether you're an entrepreneur or an employee. How to seize new opportunities and build a future-proof career. The book will provide you with loads of tips on the best apps and tools that are part of the AI revolution, but the real magic is how it changes the way you think. You'll learn new skills and timeless principles that will keep you ahead of the game, no matter how AI changes the way we work.

**Resurgent** Julian Birkinshaw, John Fallon, 2025-07-17 A practical handbook examining how established businesses can use their unique advantages to fight back and win in a digital arena too often dominated by tech start ups disruptors and unicorns The big

tech companies Alphabet Amazon Apple Meta Microsoft have had an enormous impact on our everyday lives A new wave of start ups in the tech sector has dominated the press and swallowed up huge amounts of investment But what about those established companies in the traditional parts of the world s economies from energy industrial and consumer goods to travel and health They rarely got a mention Everyone was talking about the disrupters the start ups and the entrepreneurs and not about the incumbents This book is a call for a reality check For at the core of our established companies are capabilities and qualities that remain highly relevant in the digital age They are often market leaders for very good reasons they know their customers and markets well and they have great product sales and marketing expertise They are operationally savvy and financially strong with deep insights into areas of expertise that no one else has giving them a unique advantage John Fallon and Julian Birkinshaw have come to a clear conclusion incumbents are not going quietly into that dark night Organizations will need to jettison their analogue baggage and infrastructure and embrace digital transformation They will survive and they will prosper And this shows how they are doing it
