AI-Powered Pedagogy and Curriculum Design Geoff Baker, Lucy Caton, 2025-09-17. AI Powered Pedagogy and Curriculum Design offers practical insights and guidance on the effective integration of AI tools into teaching practices and curriculum design. While numerous claims exist as to the validity and authenticity of the applications of AI in schools, too little attention has been paid to empirical research conducted with and by teachers in real world classrooms. This book synthesises diverse viewpoints from teacher educators across disciplines and levels toward a comprehensive context specific understanding of the challenges and best practices for responsibly leveraging Generative AI to enhance outcomes in classrooms. Contributors further shed light on how Generative AI can align with standards, assessment practices, and teacher training programs in different settings. Firsthand classroom experiences and experimental approaches of educators in the United Kingdom and Europe will provide current and aspiring teachers with insights into the intersection between AI and teacher empowerment, student participation, ethical implications, and socially just approaches.

Masculinities and Language Paul Baker, Gavin Brookes, 2025-03-31. Today the topic of gender identity is being discussed more widely than ever before. With the rise of online misogyny and in the wake of metoo, language around masculinity and toxic masculinity merits closer examination. Accessibly written by two leading linguists, this book provides a comprehensive treatment of the debates around language and masculinity, asking how language is used to perform masculinity and how language is used to represent men. Including examples of research from a range of international scholars along with original case studies and engaging examples from popular culture, media, literature, advertising, and politics, the authors address a wide range of theoretical and methodological standpoints. The book examines concepts of gender performativity, hegemonic masculinity, and queer theory, drawing on disciplines and methods including conversation analysis, phonetics, ethnography, interviews, focus groups, visual analysis, discourse analysis, critical discourse studies, and corpus linguistics. Situating male language use in terms of power, dominance, and subordination, the book concludes with an examination of the more recent concepts of toxic masculinity and healthy masculinity, exploring critical stances towards and around language used by men. This book demonstrates the role that linguistic research can play in addressing real world problems associated with masculinity, problems experienced by people of all genders, and the natural world more broadly. *Masculinities and Language* is vital reading for scholars, researchers, and students of language and gender, sexuality, identity, discourse analysis, and sociolinguistics within linguistics, English language, and related areas.
