Qualitative Research with Socio-Technical Grounded Theory Rashina Hoda,2024-09-13 This book is a timely and practical guide to conducting qualitative research with a socio technical approach It covers the foundations of research including research design research philosophy and literature review describes qualitative data collection qualitative data preparation and filtering explains qualitative data analysis using the techniques of socio technical grounded theory STGT and presents the advanced techniques of qualitative theory development using emergent or structured modes It provides guidance on evaluating qualitative research application and outcomes and explores the possible role of Artificial Intelligence AI in qualitative research in the future The book is structured into five parts Part I Introduction includes three chapters that

serve to provide an overview of the book in Chapter 1 a brief history of the origins and evolution of the GT methods in Chapter 2 and an introduction to STGT in Chapter 3 Part II Foundations of Research includes three chapters that cover the building blocks of empirical research through a simple yet powerful approach to designing research methods the research design canvas in Chapter 4 the fundamental concepts of research philosophy in Chapter 5 and the myriad of literature review methods including those suited to STGT in Chapter 6 Part III Qualitative Data Collection and Analysis includes four chapters that explain the key concepts related to collecting qualitative data in Chapter 7 techniques used for collecting qualitative data in Chapter 8 how to go about preparing and filtering qualitative data in Chapter 9 and the qualitative data analysis procedures of open coding constant comparison and memoing in Chapter 10 Part IV Theory Development includes two chapters that explain what is considered theory or theoretical outcomes in Chapter 11 and the advanced STGT steps of theory development in Chapter 12 Eventually Part V Evaluation and Future Directions includes two chapters that present the evaluation guidelines for assessing STGT applications and outcomes in Chapter 13 and explore new opportunities in qualitative research using large language models in Chapter 14 This book enables new and experienced researchers in modern as well as traditional disciplines to conduct rigorous qualitative research on socio technical topics in the digital world They will be able to approach qualitative research with confidence and produce valuable research outcomes in the form of rich descriptive findings taxonomies theoretical models theoretical frameworks preliminary and mature theories recommendations and guidelines all grounded in empirical evidence **A Guided Tour of Artificial Intelligence Research** Pierre Marquis,Odile Papini,Henri Prade,2020-05-08 The purpose of this book is to provide an overview of AI research ranging from basic work to interfaces and applications with as much emphasis on results as on current issues It is aimed at an audience of master students and Ph D students and can be of interest as well for researchers and engineers who want to know more about AI The book is split into three volumes the first volume brings together twenty three chapters dealing with the foundations of knowledge representation and the formalization of reasoning and learning Volume 1 Knowledge representation reasoning and learning the second volume offers a view of AI in fourteen chapters from the side of the algorithms Volume 2 AI Algorithms the third volume composed of sixteen chapters describes the main interfaces and applications of AI Volume 3 Interfaces and applications of AI This third volume is dedicated to the interfaces of AI with various fields with which strong links exist either at the methodological or at the applicative levels The foreword of this volume reminds us that AI was born for a large part from cybernetics Chapters are devoted to disciplines that are historically sisters of AI natural language processing pattern recognition and computer vision and robotics Also close and complementary to AI due to their direct links with information are databases the semantic web information retrieval and human computer interaction All these disciplines are privileged places for applications of AI methods This is also the case for bioinformatics biological modeling and computational neurosciences The developments of AI have also led to a dialogue with theoretical

computer science in particular regarding computability and complexity Besides AI research and findings have renewed philosophical and epistemological questions while their cognitive validity raises questions to psychology The volume also discusses some of the interactions between science and artistic creation in literature and in music Lastly an epilogue concludes the three volumes of this Guided Tour of AI Research by providing an overview of what has been achieved by AI emphasizing AI as a science and not just as an innovative technology and trying to dispel some misunderstandings
