Power, Privilege, and Public Health in the United States

Lorraine T. Dean, 2025-03-31 Power Privilege and Public Health in the United States discusses the ways in which power and privilege along intersectional axes of race gender sexual orientation ability and other characteristics show up in public health and medicine practice teaching and research It provides foundational knowledge on theories in power and privilege as well as historical examples of the ways in which the health and medical fields have been complicit in creating inequities and maintaining oppressive structures that can be used to understand health distribution differences and disparities In order to enact real change the contributors to this textbook enrich their chapters practical guidance for developing anti oppression competencies as well as example experiential activities to examine how our own power and privilege influence the design and interpretation of health studies and public health practice In addressing directly the actors and institutions that have led to unequitable health outcomes Power Privilege and Public Health in the United States does more than simply highlight the problems that plague American healthcare it actively engages students and readers from across a number of academic backgrounds from public health and epidemiology to psychology and social work with the tools to enact change straight from leading experts in academia and public health practice

Rock and Roll vs. Modern Life Seth Kim-Cohen, 2023-06-15 No Boomer-esque celebration of the music that defined an era Rock and Roll vs Modern Life is instead a deeply critical analysis

of rock and roll as a chaotic caterwauling project to upend the foundational presumptions of postwar values. What we have here is the closest thing yet to a unified field theory of rock and roll. In seminal performances, films, and recordings, Iggy Pop, James Brown, Patti Smith, the Last Poets, and the Sex Pistols disrupt the implicit ontologies of modernism and late stage capitalism. With its comrades, conceptual art, Black power, and poststructuralism, rock and roll strips back the linoleum surface of modern life to reveal a feral sensibility unwilling to be boxed up for clean consumption.

Teaching Copyright Sara E. Wolf, 2024-12-12. Lessons, resources, and annotated answer keys for instructors at all levels in teaching copyright law. The teaching of copyright and related concepts can easily be overwhelming to instructors who are experts in their field but may have little to no detailed understanding of copyright law. They require reliable, accessible information to coach students on copyright-related matters. Teaching Copyright: Practical Lesson Ideas and Instructional Resources provides explicit guidance based on U.S. copyright law in the teaching of copyright and related concepts to learners at schools, colleges, and universities. Instructors are supported with time-saving resources such as lesson templates, scenarios, practice activities, and a downloadable test question bank. Additionally, Bloom's Taxonomy labels lessons, activities, and assessment items to enable an appropriately diverse set of learning for students. Instead of reducing copyright to simple recall, the lessons and information in this text will help instructors develop higher-level thinking about copyright and assist them in measuring learners' abilities not just to remember but also to analyze and evaluate copyright dilemmas.

Routledge Handbook of Media Geographies Paul C. Adams, Barney Warf, 2021-10-27. This Handbook offers a comprehensive overview of media geography, focusing on a range of different media viewed through the lenses of human geography and media theory. It addresses the spatial practices and processes associated with both old and new media, considering media not just as technologies and infrastructures but also as networks, systems, and assemblages of things that come together to enable communication in the real world. With contributions from academics specializing in geography and media studies, the *Routledge Handbook of Media Geographies* summarizes the recent developments in the field and explores key questions and challenges affecting various groups, such as women, minorities, and persons with visual impairment. It considers geographical aspects of disruptive media uses, such as hacking, fake news, and racism. Written in an approachable style, chapters consider geographies of users, norms, rules, laws, values, attitudes, routines, customs, markets, and power relations. They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility, space perception, and placemaking. Structured in four distinct sections centered around control and access to digital media, mass media, mobile media, and surveillance and media and the politics of knowledge, the Handbook explores digital divides and other manifestations of the uneven geographies of power. It also includes an overview of the alternative social media universe created by the Chinese government. Media geography is a burgeoning field of study that lies at the intersections of various social sciences, including human geography, political science, sociology, anthropology, communication, media studies, urban studies, and women and
