Explainable Agency in Artificial Intelligence Silvia Tulli, David W. Aha, 2024-01-22 This book focuses on a subtopic of explainable AI XAI called explainable agency EA which involves producing records of decisions made during an agent's reasoning summarizing its behavior in human accessible terms and providing answers to questions about specific choices and the reasons for them We distinguish explainable agency from interpretable machine learning IML another branch of XAI that focuses on providing insight typically for an ML expert concerning a learned model and its decisions In contrast explainable agency typically involves a broader set of AI enabled techniques systems and stakeholders e g end users where the explanations provided by EA agents are best evaluated in the context of human subject studies The chapters of this book explore the concept of endowing intelligent agents with explainable agency which is crucial for agents to be trusted by humans in critical domains such as finance self driving vehicles and military operations This book presents the work of researchers from a variety of perspectives and describes challenges recent research results lessons learned from applications and recommendations for future research directions in EA The historical perspectives of explainable agency and the importance of interactivity in explainable systems are also discussed Ultimately this book aims to contribute to the successful partnership between humans and AI systems Features Contributes to the topic of explainable artificial intelligence XAI Focuses on the XAI subtopic of explainable agency Includes an introductory chapter a survey and five other original contributions

Data Cartels Sarah Lamdan, 2022-11-08 In our digital world data is power Information hoarding businesses reign supreme using intimidation aggression and force to maintain influence and control Sarah Lamdan brings us into the unregulated underworld of these data cartels demonstrating how the entities mining commodifying and selling our data and informational resources perpetuate social inequalities and threaten the democratic sharing of knowledge Just a few companies dominate most of our critical informational resources Often self identifying as data analytics or business solutions operations they supply the digital lifeblood that flows through the circulatory system of the internet With their control over data they can prevent the free flow of information masterfully exploiting outdated information and privacy laws and curating online information in a way that amplifies digital racism and targets marginalized communities They can also distribute private information to predatory entities Alarming everything they're doing is perfectly legal In this book Lamdan contends that privatization and tech exceptionalism have prevented us from creating effective legal regulation This in turn has allowed oversized information oligopolies to coalesce In addition to specific legal and market based solutions Lamdan calls for treating information like a public good and creating digital infrastructure that supports our democratic ideals
