Cambridge Survey Of World Migration:

The Cambridge Survey of World Migration Robin Cohen, 1995-11-02 This extensive survey of migration in the modern world begins in the sixteenth century with the establishment of European colonies overseas and covers the history of migration to the late twentieth century when global communications and transport systems stimulated immense and complex flows of labour migrants and skilled professionals In ninety five contributions leading scholars from twenty seven different countries consider a wide variety of issues including migration patterns the flights of refugees and illegal migration Each entry is a substantive essay supported by up to date bibliographies tables plates maps and figures As the most wide ranging coverage of migration in a single volume The Cambridge Survey of World Migration will be an indispensable reference tool for scholars and students in the field

Worlds in Motion : Understanding International Migration at the End of the Millennium Douglas S. Massey, Joaquin Arango, Graeme Hugo, Ali Kouaouci, Adela Pellegrino, 1999-01-28 At the end of the 20th century nearly all developed nations have become countries of immigration absorbing growing numbers of immigrants not only from developed regions but increasingly from developing nations of the Third World Although international migration has come to play a central role in the social economic and demographic dynamics of both immigrant sending and immigrant receiving countries social scientists have been slow to construct a comprehensive theory to explain it Efforts at theoretical explanation have been fragmented by disciplinary geographic and methodological boundaries Worlds in Motion seeks to overcome these schisms to create a comprehensive theory of international migration for the next century After explicating the various propositions and hypotheses of current theories and identifying areas of complementarity and conflict the authors review empirical research emanating from each of the world's principal international migration systems North America Western Europe the Gulf Asia and the Pacific and the Southern Cone of South America Using data from the 1980s levels and patterns of migration within each system are described to define their structure and organization Specific studies are then comprehensively surveyed to evaluate the fundamental propositions of neoclassical economics the new economics of labour migration segmented labour market theory world systems theory social capital theory and the theory of cumulative causation The various theories are also tested by applying them to the relationship between international migration and economic development Although certain theories seem to function more effectively in certain systems all contain elements of truth supported by empirical research The task of the theorist is thus to identify which theories are most effective in accounting for international migration in the world today and what regional and national circumstances lead to a predominance of one theoretical mechanism over another The book concludes by offering an empirically grounded theoretical synthesis to serve as a guide for researchers and policy makers in the 21st century
