Aristotle on Memory and Recollection, 2007-01-01 Based on a new critical edition of Aristotle's *De Memoria* and two interpretive essays this book challenges current views on Aristotle's theories of memory and recollection and argues that these are based on misinterpretations of the text and Aristotle's philosophical goals

Renaissance Literature and Linguistic Creativity James Harmer, 2016-03-31 Renaissance Literature and Linguistic Creativity interrogates notions of linguistic creativity as presented in English literary texts of the late sixteenth century It considers the reflections of Renaissance English writers upon the problem of how linguistic meaning is created in their work The book achieves this consideration by placing its Renaissance authors in the context of the dominant conceptualisation of the thought language relationship in the Western tradition namely that of introspection In taking this route author James Harmer undertakes to provide a comprehensive overview of the notion of introspection from classical times to the Renaissance and demonstrates how complex and even strange this notion is often seen to be by thinkers and writers Harmer also shows how poetry and literary discourse in general stands at the centre of the conceptual consideration of what linguistic thinking is He then argues through a range of close readings of Renaissance texts that writers of the Shakespearean period increase the fragility of the notion of introspection in such a way as to make the prospect of any systematic theory of meaning seem extremely remote Embracing and exploring the possibility that thinking

about meaning can only occur in the context of extreme cognitive and psychological limitation these texts emerge as proponents of a human mind which is remarkably free in its linguistic nature an irresistible mode of life unto itself The final argumentative stratum of the book explores the implications of this approach for understanding the relationship between literary criticism philosophy and other kinds of critical activity Texts discussed at length include Edmund Spenser's *The Faerie Queene* and shorter poetry George Chapman's *Ovid's Banquet of Sense* Shakespeare's *Titus Andronicus* and *Hamlet* and John Donne's *Elegies*

Putting Knowledge to Work, 2024-07-13 In the 21st century knowledge centered approaches have become increasingly popular in analytic epistemology Rather than trying to account for knowledge in other terms these approaches take knowledge as the starting point for the elucidation of other epistemic notions such as belief justification rationality etc Knowledge centered approaches have been so influential that it now looks like epistemology is undergoing a factive turn However relatively little has been done to explore how knowledge centered views fare in new fields inside and beyond epistemology This volume aims at remedying this situation by putting together contributions that investigate the significance of knowledge in debates where its roles have been less explored The goal is to see how far knowledge centered views can go by exploring new prospects and identifying new trends of research for the knowledge first program Extending knowledge centered approaches in this way not only promises to deliver novel insights in these neglected fields but also to revisit more traditional debates from a fresh perspective As a whole the volume develops and evaluates the knowledge first program in original and fertile ways

Explaining Knowledge Rodrigo Borges, Claudio de Almeida, Peter D. Klein, 2017-12-01 The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years Before Edmund Gettier published his famous 1963 paper it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence Gettier presented a powerful challenge to that presumption This led to the development and refinement of many prominent epistemological theories for example defeasibility theories causal theories conclusive reasons theories tracking theories epistemic virtue theories and knowledge first theories The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the Gettier intuition The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier s paper as are the debates between fallibilists and infallibilists Indeed it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge even those accounts that hold that the Gettier Problem rests on mistakes of various sorts This volume presents a collection of essays by twenty six experts including some of the most influential philosophers of our time on the various issues that arise from Gettier s challenge to the analysis of knowledge Explaining Knowledge sets the agenda for future work on the central problem of epistemology

Cognitive Pragmatism Nicholas Rescher, 2017-03-13 In Cognitive Pragmatism Nicholas Rescher tackles the major questions of philosophical inquiry

pondering the nature of truth and existence In the authoritative voice and calculated manner that we've come to expect from this distinguished philosopher Rescher argues that the development of knowledge is a practice pursued by humans because we have a need for its products This pragmatic approach satisfies our innate urge as humans to make sense of our surroundings Taking his discussion down to the level of particular details and addressing such topics as inductive validation hypostatization fallacies and counterfactual reasoning Rescher abandons abstract generalities in favor of concrete specifics For example philosophers usually insist that to reason logically from a counterfactual we must imagine a possible world in which the statement is fact But Rescher argues that there's no need to attempt to accept the facts of a world outside our cognition in order to reason from them He shows us how we can use our own natural system of prioritizing our own understanding of the fundamental to resolve the inconsistencies in such statements as If the Eiffel Tower were in Manhattan then it would be in New York State In using dozens of real world examples such as these and in arguing in his characteristically succinct style Rescher casts light on a wide variety of concrete issues in the classical theory of knowledge and reassures us along the way that the inherent limitations on our knowledge are no cause for distress In pragmatic theory and inquiry we must accept that the best we can do is good enough because we only have a certain albeit large set of tools and conceptualizations available to us A unique synthesis this endeavor into pragmatic epistemology will be of interest to scholars and students of philosophy and cognitive science Comptes Rendus Philosophiques ,2003
