The Jewish Ghetto and the Visual Imagination of Early Modern Venice Dana E. Katz, 2017-08-18 Dana E Katz examines the Jewish ghetto of Venice as a paradox of urban space In 1516 the Senate established the ghetto on the periphery of the city and legislated nocturnal curfews to reduce the Jews visibility in Venice Katz argues that it was precisely this practice of marginalization that put the ghetto on display for Christian and Jewish eyes According to her research early modern Venetians grounded their conceptions of the ghetto in discourses of sight Katz s unique approach demonstrates how Venice s Jewish ghetto engaged the sensory imagination of its inhabitants in complex and contradictory ways that both shaped urban space and reshaped Christian Jewish relations

The Spaces of the Modern City Gyan Prakash, Kevin M. Kruse, 2008-02-24 It historicizes the contemporary discussion of urbanism highlighting the local and global breadth of the city landscape This interdisciplinary collection examines how the city develops in the interactions of space and imagination The essays focus on issues such as street design in Vienna the motion picture industry in Los Angeles architecture in Marseilles and Algiers and the kaleidoscopic paradox of post apartheid Johannesburg They explore the nature of spatial politics examining the disparate worlds of eighteenth century Baghdad nineteenth century Morelia They also show the meaning of everyday spaces to urban life illuminating issues such as crime in metropolitan London youth culture in Dakar memory projects in Tokyo and Bombay cinema

Le Corbusier's Practical Aesthetic of the City Christoph Schnoor, 2020-10-18 Set within an insightful analysis this book describes the genesis ideas and ideologies which influenced La Construction des Villes by Le Corbusier This volume makes the important theoretical work available for the first time in English offering an interpretation as to how much and in what way his essai may have

influenced his later work Dealing with questions of aesthetic urbanism La Construction des Villes shows Le Corbusier's intellectual influences in the field of urbanism Discontent that the script was not sufficiently avant garde he abandoned it soon after it was written in the early 20th century It was only in the late 1970s that American historian H Allen Brooks discovered 250 pages of the forgotten manuscript in Switzerland The author of this book Christoph Schnoor later discovered another 350 handwritten pages of the original manuscript consisting of extracts chapters and bibliographic notes This splendid find enabled the re establishment of the manuscript as Le Corbusier had abandoned it unfinished in the spring of 1911 This volume offers an unbiased extension of our knowledge of Le Corbusier and his work In addition it reminds us of the urban design innovations of the very early 20th century which can still serve as valuable lessons for a new understanding of contemporary urban design
