Working in a Survival School Lee Del Col, Garth Stahl, 2023-05-31 Working in a Survival School documents how global educational policies trickle down and influence school cultures and the lives of educators and educational leaders The research traces the everyday work and experience of educators within an all boys Catholic college suffering an unprecedented decline in enrolment numbers In short it was a school in survival mode Drawing on Dorothy Smith s scholarship on Institutional Ethnography the authors document how the school operated and how its efforts to survive influenced the daily work of educators Institutional ethnography reveals the school as a bounded space subject to a

variety of competing local and translocal forces that are historical political and economic in nature Exploring the discursive and material effects of policy on both the work and identities of educators the authors illustrate how the everyday experience of being an educator is shaped by marketisation and how leaders engage in stratagems to promote the school as a vehicle of educational excellence and quality to lure clientele Building on existing scholarship in educational policy studies and new public management Working in a Survival School considers how the global marketisation of education systems is experienced in one school fighting to survive This book is of interest to educators school leaders and academics interested in policy enactment *The Praeger Handbook of Faith-Based Schools in the United States, K-12* Thomas C. Hunt, James C.

Carper, 2012-08-06 Exploring a subject that is as important as it is divisive this two volume work offers the first current definitive work on the intricacies and issues relative to America's faith based schools The Praeger Handbook of Faith Based Schools in the United States K 12 is an indispensable study at a time when American education is increasingly considered through the lenses of race ethnicity gender and social class With contributions from an impressive array of experts the two volume work provides a historical overview of faith based schooling in the United States as well as a comprehensive treatment of each current faith based school tradition in the nation The first volume examines three types of faith based schools Protestant schools Jewish schools and Evangelical Protestant homeschooling The second volume focuses on Catholic Muslim and Orthodox schools and addresses critical issues common to faith based schools among them state and federal regulation and school choice as well as ethnic cultural confessional and practical factors Perhaps most importantly for those concerned with the questions and controversies that abound in U S education the handbook grapples with outcomes of faith based schooling and with the choices parents face as they consider educational options for their children *The Church-State Debate* Emma Long, 2012-03-29 The Establishment Clause of the First Amendment governs the relationship between the institutions of the church and those of the state the Supreme Court as arbiter of the Constitution has since 1947 sought to determine where the line between the two should be drawn This book shows how and why the Court drew the line in particular cases and how and why the lines that were drawn by the Court had an impact on the relationship between institutions of government and the Church shaping US politics and society Using the Supreme Court's cases as a framework the book shows how the constitutional underpinnings of church state debates shaped the political economic and social debate on the issue and explores broader debates about religion and American society This book maintains that the Court cases cannot be understood separately from the context from which they arose and that legal factors are only part of a broader picture for a historical understanding of the Court and Establishment Clause cases *True Confessions* Francis X.
