Brady, 2003 The No Child Left Behind Act NCLB requires that all states install school Memphis TN in Prince George s County MD The Urban School System of the Future Andy Smarick, 2012-10-12 For more than two generations the traditional urban school system the district has utterly failed to do its job prepare its students for a lifetime of success Millions and millions of boys and girls have suffered the grievous consequences The district is irreparably broken For the sake of today s and tomorrow s inner city kids it must be replaced The Urban School System of the Future argues that vastly better results can be realized through the creation of a new type of organization that properly manages a city s portfolio of schools using the revolutionary principles of chartering It will ensure that new schools are regularly created that great schools are expanded and replicated that persistently failing schools are closed and that families have access to an array of high quality options This new entity will focus exclusively on school performance meaning among other things our cities can thoughtfully integrate their traditional public charter public and private schools into a single high functioning k 12 system For decades the district has produced the most heartbreaking results for already at risk kids The Urban School System of the Future explains how we can finally turn the tide and create dynamic responsive high performing self improving urban school systems that fulfill the promise of public education **State Strategies for Fixing Failing**

**Schools and Districts. Issue Brief** David Wakelyn, 2011 At least 5 000 public schools have failed to meet their academic achievement targets for at least five consecutive years The underlying causes of such failure are usually a combination of weak leadership inadequate skill levels among teachers and insufficient high quality teaching materials In 2009 the National Governors Association Center for Best Practices NGA Center awarded competitive grants to four states to participate in the State Strategies to Improve Chronically Low Performing Schools project The project provided Colorado Maryland Massachusetts and Mississippi with grant funds and consulting services to develop policies and plans that create the conditions to turn around chronically low performing schools and districts It yielded valuable lessons and suggested strategies that states and territories can use to fix failing schools and districts States can use the lessons learned from the NGA Center s project along with the new federal funding to step up their efforts to fix failing schools and districts in these ways 1 Build state capacity to support the turnaround of failing schools and districts 2 Engage external partners to manage school and district turnarounds 3 Set ambitious but realistic goals for school improvement that incorporate multiple measures 4 Develop a human capital strategy to improve the quality of leadership and teaching and 5 Increase state authority to intervene in failing schools and districts if other approaches prove insufficient Contains 1 chart and 38 notes
