Canadian Issues In Environmental Ethics:

Canadian Issues in Environmental Ethics Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United Canadian Environmental Philosophy C. Tyler DesRoches, Frank Jankunis, Byron Williston, 2019-07-04 Canadian States Environmental Philosophy is the first collection of essays to take up theoretical and practical issues in environmental philosophy today from a Canadian perspective The essays cover various subjects including ecological nationalism the legacy of Grey Owl the meaning of outside to Canadians the paradigm shift from mechanism to ecology in our understanding of nature the meaning and significance of the Anthropocene the challenges of biodiversity protection in Canada the conservation status of crossbred species in the age of climate change and the moral status of ecosystems This wide range of topics is as diverse and challenging as the Canadian landscape itself Given the extent of humanity s current impact on the biosphere especially evident with anthropogenic climate change and the ongoing mass extinction it has never been more urgent for us to confront these environmental challenges as Canadian citizens and citizens of the world Canadian Environmental Philosophy galvanizes this conversation from the perspective of this place Nuclear Waste Management in Canada Darrin Durant, Genevieve Fuji Johnson, 2010-07-01 As oil reserves decline and the environment becomes more prominent in public policy discussions the merits and dangers of nuclear power and nuclear waste management continue to be debated Canada is intent on building more reactors to increase energy production without harming the planet but it and other nuclear energy producing countries face not only technical problems but also social and ethical issues Nuclear Waste Management in Canada provides a critical counterpoint to the favourable position taken by government and industry The contributors build their case by exploring the following key issues and developments What do frequently used terms such as safety risk and acceptability really mean How and why did the public consultation process in Canada fail to address ethical

and social issues What is the significance and potential of a public consultation process that involves diverse interests epistemologies and actors including Aboriginal peoples And how do we ensure that the frameworks for discussion are inclusive and ethical This collection is a timely antidote to the uncertainty ambiguity and ignorance that surrounds discussions about nuclear energy Sustainable Development and Canada O.P. Dwivedi, 2001-05 Canada is one of the most beautiful varied and inspiring natural environments on earth Few countries contain such topographical differences as the West Coast the mountain regions the prairies the Arctic the cityscapes close to the American border and the eastern forests The Canadian territory is the second largest in the world and it borders on three oceans its fourth border is with the United States the most powerful economy in the world This provides Canadians unique access to a large market but also raises many problems related not only to political and cultural influence but to transborder pollution This book investigates the complexities of Canadian environmental policy The text is split into three sections the political context in which decisions are made issue areas in need of engagement and perspectives on the achievement of sustainable development which colour the Canadian conceptual landscape The first section outlines the state of the Canadian environment the actors and institutions involved in environmental policy formation and a detailed history of Environment Canada and the international context of modern decision making The second section is issue specific including chapters on environmental law risk management and environmental impact assessment international treaties and conventions involving Canada and an overall assessment of Canadian policy The final section deals with values and theories from gender issues to environmental ethics The book serves as a comprehensive introduction that makes explicit recognition of the transnational character of environmental policy formation in the era of globalization and offers critical insights into the decision making process
