Cancer And The Family:

Cancer and the Family Lea Baider, Cary L. Cooper, Atara Kaplan De-Nour, 1996-05-27 This volume is the result of many years of clinical research by medical and health care professionals working with cancer patients and their families. It demonstrates the impact of cancer at different stages of a patient's life and how certain factors influence treatment and management.

Cancer and the Family Life Cycle Theresa A. Veach, Donald R. Nicholas, Marci A. Barton, 2013-05-13 This book uses current psychosocial literature in combination with empirical research and clinical accounts of family adaptation to help professionals and families cope with the impact of cancer. It is broad in scope and includes families in any life cycle: i.e. single adults, children, adolescents, and later life. This book, with its solid theoretical foundation, will be especially beneficial to any professional who is helping a family to adapt to cancer.

Childhood Cancer and the Family Mark A. Chesler, Oscar A. Barbarin, 1987

Cancer in Our Family Sue P. Heiney, Joan F. Hermann, 2013 Explains to parents how to talk to children to help them cope when their mother or father is diagnosed with cancer in a book that also has an illustrated activities section.

Collection and Use of Cancer Family History in Primary Care Nadeem Qureshi, 2009-05 This systematic review was undertaken to: 1. evaluate the accuracy of patient reporting of cancer family history; 2. identify and evaluate tools designed to capture cancer family history that are applicable to the primary care setting; and 3. identify and evaluate risk assessment tools (RATs) in promoting appropriate management of familial cancer risk in primary care settings. For family history tools (FHxTs) and RATs studies were limited to those applicable to primary care settings. Conclusions: Informants reporting their cancer family history have greater accuracy for relatives free of cancer than those with cancer. Reporting accuracy may vary among different cancer types. Surviving Cancer as a Family and Helping Co-Survivors Thrive Catherine A. Marshall, 2010-06-16 Within this book, family members will find the information they need to better understand and cope with cancer in the family, thereby helping their loved one and themselves most effectively. Family members of individuals diagnosed with cancer are themselves cancer survivors. Yet all too often their needs, questions, and concerns are not systematically addressed by the medical and human services systems. *Surviving Cancer as a Family and Helping Co-Survivors Thrive* was written to help everyone touched by cancer understand and cope. In this unique book, answers to practical questions including how and where to find financial and emotional support as a caregiver are explored through research and personal experience. Influences such as culture and socioeconomic status that impact the family system within which a cancer patient is cared for are addressed as well. Recognizing that family members sometimes need help even more than their loved one with cancer, the book provides vignettes demonstrating situations and solutions for particular ethnic and cultural populations and for spouses, partners, and children of cancer patients. Easy to read and use, *Surviving Cancer as a Family and Helping Co-Survivors Thrive* will quickly give readers the knowledge to cope with a cancer diagnosis of a loved one or even themselves.

Childhood Cancer Adolf E. Christ, Kalman Flomenhaft, 2012-12-06 The past decade has brought extraordinary gains in the outlook for children stricken with cancer Though cancer remains a leading cause of death for children and young adults more victims of child hood cancer today will survive than will die The therapeutic advances and the optimism they instill have prompted researchers and clinicians to analyze the impact of cancer upon young patients and their famil ies and to devise more effective intervention strategies Hope and survival juxtaposed with the continuing high mortality associated with certain forms of the illness add new challenges to management of the psychosocial aspects of cancer To respond to these

challenges we need research as rigorous as that which continues to make inroads in treating the physical illness This specific concern for the needs of children suffering from cancer and their families has paralleled an increasing sensitivity on the part of the medical community and the public at large to the limitations of specialized high technology health care practices
