Cancer Cell Structures Carcinogens And Genomic Instability:

Cancer: Cell Structures, Carcinogens and Genomic Instability Leon P. Bignold, 2006-01-27 This volume began with an invitation from the publishers to edit a volume of EXS on Cancer This invitation undoubtedly derived from my articles in Cellular and Molecular Life Sciences in 2002 and 2003 on the relationships between the morphology aetiology and pathogenesis of tumours especially in relation to genetic instability After many years of teaching the theories of cancer in undergraduate medical school courses it seemed to me that the variably chaotic histopathologic features of tumours parallel in some way the variably unstable genomes of tumour cells which were being discovered in the 1990s Thus the title of the volume has come to include morphology carcinogenesis and genetic instability The invitation came while I was working with Herrn Dr med Hubertus Jersmann MD D sseldorf PhD now Senior Lecturer in Medicine of the University of Adelaide and Professor Brian Coghlan Emeritus Professor of German the University of Adelaide on the work of the nineteenth century cancer pathologists especially David Paul von Hansemann 1858 1920 With the delivery of the manuscripts from the authors of the chapters it became obvious that a background chapter for the volume could include some of the material which we had uncovered together Because of this chapter 1 is authored by the three of us and the new material figures prominently

Fractals in Biology and Medicine Gabriele A. Losa, Danilo Merlini, Theo F. Nonnenmacher, Ewald R. Weibel, 2005-08-18 This volume is number four in a series of proceedings volumes from the International Symposia on Fractals in Biology and Medicine in Ascona Switzerland which have been inspired by the work of Beno t Mandelbrot seeking to extend the concepts towards the life sciences It highlights the potential that fractal geometry offers for elucidating and explaining the complex make up of cells tissues and biological organisms either in normal or in pathological conditions Salivary Gland Pathology Eric R. Carlson, Robert A.
