Consciousness and Intentionality: Models and Modalities of

Attribution D. Fisette,2013-03-14 Philosophy of mind has been one of the most active fields in philosophy for the past three decades One of the most significant factors in the development of this discipline has been the emergence of cognitive science and the interest philosophers have taken in the empirical study of mind Another equally important factor has been the naturalistic turn brought about by W V Quine His proposal that normative epistemology be replaced by empirical psychology marked a radical departure from the Fregean anti psychologism and apriorism that had characterized much of the analytic tradition in philosophy But while Quine's program of naturalization called the attention of philosophers to empirical psychology his conception of psychology was inspired by an austere behaviorism which shunned the mentalism of intentional psychology in the Brentanian and phenomenological tradition Thus while agreeing with Brentano that the intentional idiom could not be reduced to that of the natural sciences Quine argued that it is of a piece with the indeterminacy of translation Most contributors of this collection share the cognitivist stance and believe that the mind needs to be explained rather than eliminated Three main questions are actually confronting current philosophers of mind each addressed by one or another of the contributors to the present collection

The Nature of Consciousness Mark Rowlands,2001-10-11 In *The Nature of Consciousness* Mark Rowlands develops an innovative account of the nature of phenomenal consciousness one that has significant consequences for attempts to find a place for it in the natural order The most significant feature of consciousness is its dual nature consciousness can be both the directing of awareness and that upon which awareness is directed Rowlands offers a clear and philosophically insightful discussion of the main positions in this fast moving debate and argues that the phenomenal aspects of conscious experience are aspects that exist only in the directing of experience towards non phenomenal objects a theory that undermines reductive attempts to explain consciousness in terms of what is not conscious His book will be of interest to a wide range of readers in the philosophy of mind and language psychology and cognitive science

TRINITY IN SAPIENTO-ONCCOLOGY Augustin Ostace,2025-06-06 For the understanding and analysis in depth biology of this dramatic disease in Human Sapiens it is necessary to be prepared not only in two or three of four generations of searchers and researchers but to the entire existence and essence of the Species Sapiens as a wholeness of its Anatomy and Embryology of its Physiology of its Pathology and subsequently of its evolutionary and revolutionary of its Anatomy in Thinking in Rethinking and in Creativity as Anatomology and of its Anatom Ontology The Logos of Human Sapiens Anatomy and Ontology of the same Human Sapiens Anatomy is interrelated by the SOPHOS of the Human Sapiens Anatomy and this Trinity of LOGOSONTOSOPHOS have made out this uniqueness of Genesis and Evolution GENEVO of Geology and Biology of Planetary Earth by adding lastly to GENEVO also the powerful of Selection Multi polar Selection i.e the Selection acting and reacting at all levels of the organization of matter naming here Elementary Particles Atoms Biomolecules Cell Tissue Organs
