Student Voices in Formative Assessment Feedback Pernille Fiskerstrand, Wenke Mork Rogne, Paul Kessler Rogers, Fabienne Van Der Kleij, 2025-10-23 This Research Topic seeks to bring forward new empirical research on students' experiences and emotions toward formative assessment feedback. Research on formative assessment has expanded considerably over the last decades. Lee et al 2020, Morris et al 2021, Shute 2008 and research has identified positive learning effects from the student's perspective. Weurlander et al 2012. However, in their extensive review, Van der Kleij and Lipnevich 2021 found that the field of students' perceptions of assessment feedback lacks clear definitions in addition to deeper relations to theory. Methodological shortcomings in self-reporting feedback studies are also found in Brown and Zhao 2023. Consequently, the relatively large body of research on the topic is isolated and diverse. As such, the existing research offers minimal understanding of the connection between students' perceptions of feedback, their engagement with it, and the outcome of the assessment feedback. Van der Kleij, Winstone, Elementary students' view of formative assessment processes and outcomes, Assessment environment for different groups, levels of students, Longitudinal perspectives on emotions towards formative assessment, Theoretical approaches to students' perceptions of assessment feedback, Students' view of the feedback process as generators of feedback, Students' experiences of use of AI in assessment.
