Carr,2018-01-11 Tea is big business After water tea is believed to be the most widely consumed beverage in the world And yet as productivity increases the real price of tea declines while labour costs continue to rise Tea remains a labour intensive industry With a distinguished career spanning over 50 years and rich experience in diverse crops Mike Carr is eminently qualified to indulge in an intelligent discourse on tea agronomy In addition to a comprehensive review of the principal tea growing regions worldwide in terms of structure productivity and principal constraints he has attempted to question and seeks to find the associated experimental evidence needed to support current and future crop management practices The book will assist all those involved in the tea industry to become creative thinkers and to question accepted practices International in content it will appeal to practitioners and students from tea growing countries worldwide **Tea** K.C. Willson,M.N. Clifford,2012-12-06 Tea is a unique crop and incidentally a very interesting and attractive one The tea bush its cultivation and harvesting do not fit into any typical cropping pattern Moreover its processing and marketing are specific to tea Thus the Tea Industry stands apart and constitutes a self contained entity This is reflected in the title given to this book Tea Cultivation to consumption and its treatment of the subject The book is logically planned starting with the plant itself and finishing with the traditional cuppa Every aspect of tea production is covered inevitably some in greater detail than others However it gives an authentic and comprehensive picture of the tea industry The text deals in detail with cultural practices and research where desirable on a regional basis The technology of tea cultivation and processing has been developed within the industry aided by applied research which was largely financed by the tea companies themselves This contributed to a technically competent industry but tended to bypass the more academic and fundamental investigations which might bring future rewards The sponsorship of research has now widened and the range and depth of tea research has increased accordingly The editors and authors of this book have played their part in these recent developments which are well reported in the book **The Camellia Review** ,1983 **Efficiency of Water Use in Crop Systems** Association of Applied Biologists.
