

A black and white photograph of a young boy with light-colored hair, smiling and standing inside a large, horizontal tire. The tire is lying flat on a grassy lawn. In the background, there is a house with a porch and a large tree on the left side. The overall scene is a nostalgic, childhood-themed image.

The wounded childhood Sebastián León, 2024-10-01 1 We all carry the burden of childhood emotional wounds 2 Some of these wounds are circumstantial and minor whereas others are deep and chronic such as those that respond to experience of childhood mistreatment physical violence psychological violence sexual abuse parental negligence abandonment 3 These childhood emotional wounds by being open and not sufficiently healed tend to affect obstacle or interrupt adult life 4 Psychotherapy with adults can very well be understood from its roots as the joint process of healing the childhood emotional wounds 5 Speaking of the wounded childhood is acknowledging childhood as the most important period in the emotional construction of an individual 6 This does not imply ceasing to consider the emotional wounds whose origin comes from adolescence or adulthood 7 Childhood emotional wounds tend to occur in the context of

early relationships with parents or caregivers as well as with siblings or other figures of the nuclear family It is also necessary to add the school environment 8 The wounded childhood refers especially to the complex relational trauma i e the intolerable and chronic suffering or pain that happens every day during development and frequently in the context of significant and close interpersonal relationships 9 If the wounded childhood is a mistreated childhood then its opposite is a well treated childhood 10 An upbringing based on good treatment and on an education for non violence are fundamental pillars of mental health
