Darius Razavi, Nicole Delvaux

Cancer Du Sein Les Traitements Ala Phase Prace:

Cancer du sein Paul-Henri Cottu, 2002 Cet ouvrage coordonné par Paul Henri Cottu est le deuxième titre d'une série consacrée au cancer du sein. Il a pour objectif de présenter une revue la plus actuelle possible des méthodes thérapeutiques aujourd'hui en vigueur dans les cancers du sein la phase précoce. La première partie précise les indications, les modalités et les limites des nouveautés chirurgicales : conservation mammaire et PAMectomie, modes d'exploration moins invasifs et technique du ganglion sentinelle, aspiration du creux axillaire. La deuxième partie détaille les apports des traitements médicaux : résultats obtenus avec l'hormonothérapie et la chimiothérapie, perspectives thérapeutiques avec les anticorps monoclonaux et les nouveaux traitements hormonaux. La dernière partie est réservée à la radiothérapie qui occupe une place fondamentale dans les traitements du sein la phase précoce : ses indications, ses modalités, techniques actuelles et futures. Outil de travail, cet ouvrage s'adresse aux chirurgiens, aux oncologues médicaux, aux radiothérapeutes, aux gynécologues et aux médecins traitants qui assurent la prise en charge multidisciplinaire du cancer du sein.

Psycho-oncologie Darius Razavi, Nicole Delvaux, 2019-10-22 La prise en charge des patients en oncologie implique tous les acteurs des soins : oncologues, chirurgiens, médecins généralistes, psychiatres, psychologues, infirmiers, kinésithérapeutes, etc. Les interventions sont diverses et spécifiques : les interventions préventives pour éviter le développement d'une morbidité prévisible, la réhabilitation pour réduire ou supprimer les invalidités après la guérison, les interventions de soutien pour accompagner le patient et ses proches lors des phases de diagnostic, de traitement, de rémission ou de survivorship, de progression, enfin la palliation pour améliorer le confort lorsqu'un traitement visé curatif ne peut plus être assuré. Le contenu de cet ouvrage reflète l'état actuel de la clinique psycho-oncologique. Les différents types d'adaptation psychologique et les troubles psychiatriques pouvant survenir sont décrits tant pour les patients que pour les proches. De nombreux concepts sont présentés et discutés : le stress, l'incertitude, la détresse, la souffrance, le déni, les attributions, la résilience, etc. Certaines problématiques particulières sont aussi présentées et développées : les comportements à risque et les facteurs de risque psychologiques liés au développement du cancer, l'adaptation et ses troubles aux différentes phases de la maladie, les troubles cognitifs, la confusion mentale, l'adaptation des proches, les réactions des adolescents et jeunes adultes, les réactions des enfants face au cancer d'un parent, la prise en charge de la douleur, les prises de décisions en fin de vie et le deuil. Les diverses interventions psychologiques spécifiques ou non, ces problématiques sont exposées : information, éducation thérapeutique, non directives et directives, associées ou non des traitements psychopharmacologiques. Les auteurs donnent une place particulière à la communication soignant-soigné et donc au rôle primordial de la formation psychologique du personnel soignant afin de permettre la transmission la plus appropriée possible des données complexes liées à la maladie et aux traitements. Cette formation est aussi primordiale pour apporter un soutien tant au patient qu'à ses proches.
