**Understanding Religion and Artificial Intelligence** Randall Reed, Tracy J. Trothen, 2025-09-15. Is artificial intelligence just another tool or is it something more? Special In Understanding Religion and Artificial Intelligence: Meaning Making in the Digital Age. Randall Reed and Tracy J. Trothen delve into this provocative question, revealing how our perceptions of AI are deeply intertwined with age-old human impulses to define the extraordinary. Introducing their innovative Model of the Special, Reed and Trothen illuminate how individuals, groups, and cultures dynamically shape AI's meaning, ranging from the mundane to the Sacred and Demonic. Through compelling case studies from AI chatbots, sport, and art to self-driving cars and Deadbots, the authors explore how narratives of awe, fear, and even transcendence position AI as a truly Special thing in our modern world. Drawing on insights from religious studies, ethics, and sociology, this interdisciplinary exploration provides a crucial framework for understanding the profound societal, ethical, and spiritual implications of AI. Understanding Religion and Artificial Intelligence invites readers to engage in vital conversations about AI's impact on meaning, values, and the very fabric of human experience in this rapidly evolving digital age. Prepare to see AI and ourselves in a whole new light.

*Cavell's Ontology of Film* Jeroen Gerrits, 2026-01-13. Cavell's Ontology of Film presents ten essays by some of the most prominent international scholars of Stanley Cavell's work with a double purpose: to look back half a century after its original publication at Cavell's now seminal film philosophical book *The World Viewed* (1971, enlarged 1979) and to draw on its concepts to assess the world in the current age of digital media and climate change. The volume opens with a series of essays that revisit Cavell's discussion of film, crucially including classical Hollywood movies in the context of modernism. Several authors consider whether this preoccupation with modernism in Cavell's early work ultimately and anachronistically gave way to an embrace of romanticism, or whether Cavell conceives these frameworks as offering different responses to the persistent problem of skepticism. Others consider how popular filmmakers or film genres outside Hollywood might contribute to or alter Cavell's thoughts on the movies. Moreover, taking to heart that some of Cavell's main lines of thought are premised on the idea of film as an analog medium that projects and screens the world inside a theater, several contributions to this

volume nevertheless project *The World Viewed*’s concepts onto the future of our televisual and digital culture The volume finally loops back to Cavell’s discussion of modernism in *The World Viewed* so as to find the seeds of a Cavellian politics for the age of climate disaster Thus beyond celebrating the past through a collection of reviews and reflections on *The World Viewed* a book of ontological reflection that themselves conceive the world on screen as a world past the present volume is best understood as a series of Cavellian meditations on media and mediated relations to the world sustained in the wake of Cavell’s own passing 2018 by an ongoing current of thought on the idea of temporality itself *Technology and Testing* Fritz Drasgow, 2015-08-20 From early answer sheets filled in with number 2 pencils to tests administered by mainframe computers to assessments wholly constructed by computers it is clear that technology is changing the field of educational and psychological measurement The numerous and rapid advances have immediate impact on test creators assessment professionals and those who implement and analyze assessments This comprehensive new volume brings together leading experts on the issues posed by technological applications in testing with chapters on game based assessment testing with simulations video assessment computerized test development large scale test delivery model choice validity and error issues Including an overview of existing literature and ground breaking research each chapter considers the technological practical and ethical considerations of this rapidly changing area Ideal for researchers and professionals in testing and assessment *Technology and Testing* provides a critical and in depth look at one of the most pressing topics in educational testing today The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **University of Illinois Film and Video** University of Illinois Film Center, 1988 **Popular Photography**, 1992-08 *Eye-ai*, 1992 *Fostering Economic Development*, 1983 *Popular Electronics*, 1979 **Popular Science**, 1989 *Discovering Computers 2002* Gary B. web molecular driving forces second edition is an introductory statistical thermodynamics text that describes the principles and forces that drive chemical and biological processes it demonstrates how the complex behaviors of molecules can result from a few simple physical processes and how simple models provide surprisingly accurate insights
