Artificial Intelligence and Its Practical Applications in the Digital Economy Yahya Mohamed Elhadj, Mohamedade Farouk Nanne, Anis Koubaa, Farid Meziane, Mohamed Deriche, 2024-12-17 Artificial Intelligence AI technologies hold immense promise for developing countries by offering innovative solutions to longstanding challenges By leveraging AI in health care education economic development infrastructure and resource management these countries can potentially leapfrog traditional development stages and improve the quality of life for their populations However it s essential to approach AI deployment with ethical considerations to ensure that the technology serves the best interests of these communities and thus to maximize the expected benefits The I2COMSAPP 24 International Conference on Artificial Intelligence and its Applications in the Age of Digital Transformation aims to provide an excellent opportunity to gather experts researchers practitioners and innovators from various fields to explore the latest advancements challenges and practical implementations of artificial intelligence and machine learning ML technologies Moreover it aims to foster knowledge sharing collaboration and networking among professionals who are driving responsible and innovative use of AI and leveraging real world applications for the betterment of society and industries

Artificial Intelligence in Animal Behaviour, Veterinary Behaviour and Neurology Holger Andreas Volk, Jasmin Nicole Nessler, Anna Zamansky, Sebastian Meller, Annika Bremhorst, 2025-08-18 The new leap innovation Artificial Intelligence AI will significantly accelerate the speed of science and translate into clinical practice faster than clinicians ever have been used to Machine and deep learning techniques are now readily available to analyze large and complex data sets providing veterinary scientists with a tool to not only better understand complex behaviour traits and neurological conditions but also to delve into the nuances of animal behaviour itself AI can now write plausible sounding text recognize written or spoken human words recognize objects in images or analyze large amounts of data Different fields of applications are known so far such as improving and speeding up interpretation of radiologic findings interpretation of electroencephalography diagnosis of autism in children objectifying ataxia in dogs detecting pain in cats and assessing and characterizing animal behaviours across species At the time of writing more than 500 AI based algorithms have been approved by the FDA for human medicine most of which are used in radiology and neurology In veterinary neurology and animal behavioural science only a limited amount of research on AI has been done so far Most algorithms presented are merely fragments of usable programs and are not suitable for clinical application Therefore ready to use applications are rare yet essential for implementing AI into everyday routine diagnostic work ups scientific research and animal behavioural assessments The research topic will help to unite current efforts and provide a collection of articles to address some of the current scientific and behavioural gaps In the future a clinician might have a clinical decision support tool that generates accurate estimations of likely outcomes of neurological disease and animal behaviour combining anamnestic behavioural clinical pathology and imaging information We are interested in original research systematic

reviews and opinion papers not only about the scope and potential of AI for Veterinary Behavior and Neurology but also about the intersection of AI with the study of animal behaviour ethical considerations and pitfalls that the development of AI generated tools could present Potential themes therefore include but are not limited to AI to recognize monitor diagnose or characterise behaviour neurological deficits or conditions including a detailed analysis of animal behaviour across a variety of contexts and species AI to assess behavioural states in both clinical and natural environments AI to interpret scientific clinical data sets such as clinical pathology omics imaging EEG data and behaviour metrics Ethical and legal considerations when applying or using AI tools in the study of animal behaviour and veterinary medicine Potential of AI to enhance clinical practice in veterinary behavioural medicine veterinary neurology and animal behaviour research Potential of AI enhanced diagnostic and behavioural assessment tools with animals
