Attracting and Keeping the Best Teachers Anna Sullivan, Bruce Johnson, Michele Simons, 2019-08-26 This book challenges dominant thinking about early career teachers and their work. It offers an in depth and critical analysis of policies concerning the work of early career teachers and how they are supported during this critical period when they are highly vulnerable to leaving the profession. Moreover, the book provides examples from actual practice that illustrate how to help early career teachers make a successful transition into the profession. These practices promote early career teachers' development and help the profession as a whole to capitalize on the new knowledge and skills that these teachers bring to their classrooms and their students. The book is divided into two main parts. Part 1 deals with the difficult to define process of retaining early career teachers and its respective chapters consider this broad issue from an international perspective. They explore how policies and practices have an impact on what happens in schools and what it means to be a teacher and to teach. In turn, Part 2 focuses on the need to reconsider the policies and practices that create the problem of early career teachers and offers alternative ways forward. Each chapter addresses a specific aspect of the early career teacher retention issue contributing to a greater understanding of how we can rethink the work of early career teachers so that they can more successfully transition into the profession.

Examining the Phenomenon of "Teaching Out-of-field" Linda Hobbs, Günter Törner, 2019-01-01 This book identifies and surveys the major themes around out of field teaching that is teaching subjects or year levels without a specialization. This has been an issue in many countries for some time yet until recently there has been little formal research and poor policy responses to related problems. This book arises out of collaborations between members of an international group of researchers and practitioners from Australia, Germany, Ireland, England, South Africa, Indonesia and the United States. Cross national comparisons of ideas through case studies, descriptions of practice and research data interrogates the experiences, practices and contexts relating to out of field teaching. In particular, the book considers the phenomenon of out of field teaching in relation to national policy contexts, local school leadership practices, professional development. The book represents an essential contribution on a highly topical issue that has implications for quality and equitable education around the globe.
