**The Diaries of James Simmons, Paper Maker of Haslemere, 1831-1868** James Simmons, Alan Crocker, 1990

**The Diaries of James Simmons, Paper Maker of Haslemere, 1831-1868** James Simmons, Alan Crocker, Martin Kane, 1990     *The Industrial Revolution* William J. Ashworth, 2017-01-26 The British Industrial Revolution has long been seen as the spark for modern global industrialization and sustained economic growth Indeed the origins of economic history as a discipline lie in 19th century European and North American attempts to understand the foundation of this process In this book William J Ashworth questions some of the orthodoxies concerning the history of the industrial revolution and offers a deep and detailed reassessment of the subject that focuses on the State and its role in the development of key British manufactures In particular he explores the role of State regulation and protectionism in nurturing Britain's negligible early manufacturing base Taking a long view from the mid 17th century through to the 19th century the analysis weaves together a vast range of factors to provide one of the fullest analyses of the industrial revolution and one that places it firmly within a global context showing that the Industrial Revolution was merely a short moment within a much larger and longer global trajectory This book is an important intervention in the debates surrounding modern industrial history will be essential reading for anyone interested in global and comparative economic history and the history of globalization     *Power from Wind* Richard Leslie Hills, 1996-09-12 The wind is a fickle source of power Windspeeds are frequently too low to be of any practical use so that windpower has generally remained a marginal resource Since the inception of windpower around 1000 AD technology has been deployed to obtain the most economical power from wind The author traces its technical evolution concentrating on the growth in understanding of wind and charting crucial developments in windmill design The history of the windmill is focused on North Western Europe drawing on the origins of the first horizontal windmills in Persia Tibet and China Industrial applications such as in textiles papermaking and mining are examined Gradually windmills were improved but were finally eclipsed by steam engines in the nineteenth century due to increased levels of industrialisation The book concludes with a look at the recent re emergence of windpower as a viable source of power in the wake of the energy crisis     *Surrey Archaeological Collections* Surrey Archaeological Society, 2001 List of members     **Bulletin**, 1990     *Private Press Books*, 1992     **Antiquarian Book Monthly Review**, 1991     *The Private Library*, 1990     *The Great Famine and Beyond* Donald M. MacRaild, 2000 The Great Famine 1845-51 looms large in the popular imagination of Irish migration and has a profound influence on the way the history of the Diaspora is written This is hardly surprising for in a little over a decade more than two million people disappeared from Ireland with over half of them emigrating This exodus was greater than the total number of those who had left in the previous 250 years The Great Famine and Beyond offers a bold and original re examination of Irish migrants in modern Britain Many leading names and several new researchers offer fresh perspectives and up to date research on this aspect of the Irish Diaspora Back cover     Basic Electronics Theory Delton T.
