Arrangement Martin Lohse, 2022-02-16 Arrangement can be created in a myriad of ways both

stylistically and compositionally In this book I have for pedagogical and didactic reasons chosen arrangement on a classical romantic basis with voicing and dissonance treatment etc appropriate to this style idiom The examples in the book have been prepared on the basis of three Carl Nielsen songs with accompanying chords arranged for string quartet wind quintet and choir respectively In the three arrangements the classical accompaniment instruments such as piano guitar harp and marimba etc are deliberately avoided instead the book works with melody instruments This is done in order to be able to work in depth with the challenges that arise when a melody instrument has to accompany another instrument The methods and techniques used throughout the book are based on my experiences as a composer and as a teacher of music theory and arrangement at the conservatory for many years Through analysis and hands on work the reader's understanding and craftsmanship are built up in arrangement The hands on work is illustrated with numerous examples I have prepared to give a glimpse into the compositional workshop and the reader is guided through the compositional process including the problems that arise as well as testing possible solutions In this way he/she can develop and refine his/her craft in the intense work with both the detail and the broad lines of the form An important part of acquiring skills in composition and arrangement is listening analyzing and trying out and then listening analyzing and trying out again For this reason an audio file in NotePerformer has been created for all relevant examples in the book which can be heard downloaded at www.martinlohse.dk/arrangement/sound/zip

Nation and Classical Music

Matthew Riley, Anthony D. Smith, 2016 How and why do listeners come over time to feel the nation through particular musical works This book develops a comparative analysis of the relationship between western art music nations and nationalism It explores the influence of emergent nations and nationalism on the development of classical music in Europe and North America and examines the distinctive themes sounds and resonances to be found in the repertory of each of the nations Its scope is broad extending well beyond the period 1848-1914 when national music flourished most conspicuously The interplay of music and nation encompasses the oratorios of Handel the open air music of the French Revolution and the orchestral works of Beethoven and Mendelssohn and extends into the mid twentieth century in the music of Prokofiev Shostakovich and Copland The book addresses the representation of the national community the incorporation of ethnic vernacular idioms into

art music the national homeland in music musical adaptations of national myths and legends the music of national
 commemoration and the canonisation of national music Bringing together insights from nationalism studies musicology and
 cultural history it will be essential reading not only for musicologists but for cultural historians and historians of nationalism
